Savo Rewards QA Final Report

Redmine #165177 (Savo Rewards System Revamp) & #165348 (Multiple Reward Redemptions When Shipping Cost Increases)

Date	28 Sep 2026
Environment	Staging CRM https://staging5.rolustech.com:4220; Portal https://staging5.rolustech.com:4225
CRM user	maria.tariq (admin)
Portal user	sidney@savostore.com (contact: Sidney Test)
Payment	Stripe sandbox, card 4242
Admin rewards settings	Earn 5%; redeem cap 10% of shipping
Test case sources	#166023 (for #165177), #165932 (for #165348)

Test orders

Order	Purpose	CRM link
A1157	USD, earn test	https://staging5.rolustech.com:4220/index.php?module=AOS_Invoices&action=DetailView&record=69efbf84-c4c0-9bc5-9692-6aba7b399e55
A1158	USD, session + multi-redeem	https://staging5.rolustech.com:4220/index.php?module=AOS_Invoices&action=DetailView&record=c4dff18c-18e2-781d-beac-6aba7fc71894
A1159	KES, admin / non-shipping / KES	https://staging5.rolustech.com:4220/index.php?module=AOS_Invoices&action=DetailView&record=8eb1ac9e-f796-60e9-18ef-6aba895189aa
B1461	KES Buy & Ship	https://staging5.rolustech.com:4220/index.php?module=AOS_Quotes&action=DetailView&record=40837d47-8fe6-2c67-f154-6aba90387fc0

Wallet timeline (contact Current / Total (lifetime) / Used)

Step	Current	Total	Used	Gap vs Total - Used
Start (baseline)	597.02	1,111.65	494.13	20.50
After A1157 earn $50	647.02	1,161.65	494.13	20.50
After abandoned Stripe on A1158 ($50 burned)	597.02	1,161.65	544.13	20.50
After $45 pay (A1158)	552.02	1,161.65	589.13	20.50
After $40 pay (A1158)	512.02	1,161.65	629.13	20.50
After admin KES 14,000 ($100) on A1159 + Stripe open/pay	412.02	1,161.65	629.13	120.50

Portal wallet always matched CRM Current.

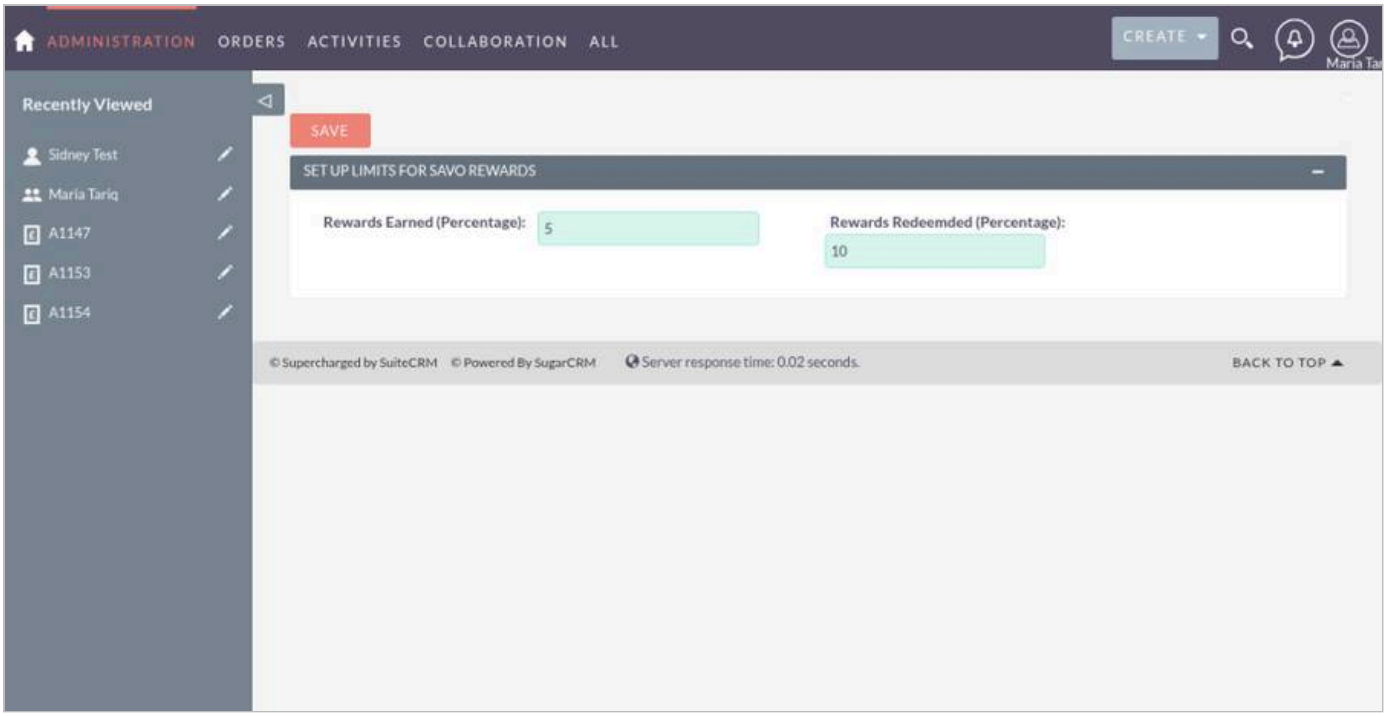

Fig. 1 - `recon-02-rewards-settings.png`: Rewards settings

Executive summary

Testing is complete. Core cap maths on the first payment, anti-overpay after a shipping increase, CRM/portal parity, KES conversion and multi-redemption on Shipping Only orders work. The main problems are how and when rewards are committed: portal rewards are committed as soon as Stripe checkout opens (abandoning checkout burns them), and CRM admin redemptions never become Used, so the wallet drifts from Lifetime - Used. The "you can use up to" figure after a partial apply is also wrong.

Main cases

	PASS	FAIL	PARTIAL	BLOCKED	NOT VERIFIED	SKIPPED	Total
#165348 (E0-E2, A1-A14)	13	1	2	0	1	0	17
#165177 (B1-B19)	5	9	3	0	1	1	19

Cross-cutting checklists

	PASS	FAIL	PARTIAL	BLOCKED	NOT VERIFIED	SKIPPED	Total
#165348 (C1-C11)	4	4	1	0	1	0	10
#165177 (C1-C11)	2	5	0	0	1	0	8

Counting: A8 counted Partial (cap checks pass; payment/commit Blocked - no card option on B&S, M-Pesa out of scope). A12 counted Partial (flow pass, final W = L - U fails). B8 counted Fail (prefill/limits/currency pass; wallet commit/status fail). B16 counted Fail (steps 1-2 fail, step 3 pass). #165177 master happy path: Partial (blocked by bug 1).

Top issues

1. **Critical** Portal rewards are committed when Stripe checkout opens, not after successful payment; abandoning checkout burns rewards
2. **High** Remaining "you can use up to" / replacement limit computed on the rewards-reduced balance
3. **High** CRM admin Rewards Redeemed saves as Applied; wallet not deducted on save; Used never incremented
4. **High** Pre-existing wallet drift: Current Rewards 20.50 below Total - Used
5. **Medium** Portal apply does not persist when an admin "by" redemption exists on the order

Blocked / not verified

- A8 (B&S): payment and commit not tested - B&S invoice offers only M-Pesa, Stripe route redirects to list.
- A13 / C11 / B17: webhook retry and orphan pending cannot be produced from the UI.
- B18: M-Pesa skipped per instruction.

Task #165177 - Savo Rewards System Revamp

Test cases: Redmine #166023. Earn foundation E0-E2 is shared with #165348 and reported there.

Case summary

ID	Title	Result
B1	Session ephemeral	FAIL
B2	X clears and restores Applicable	PARTIAL
B3	Below-max succeeds; remaining copy drops	FAIL
B4	Portal payable = Stripe	PASS
B5	Commit only on success; no double deduct	PARTIAL
B6	Failed / abandoned payment	FAIL (CRITICAL)
B7	Soft Back re-apply	FAIL
B8	CRM Admin Rewards Redeemed (SO + BAS)	FAIL (mixed - several sub-checks pass)
B9	Total Shipping Cost on create	PASS
B10	Wallet integrity	FAIL
B11	Portal success visible in CRM	PASS
B12	Apply -> Remove -> Apply does not inflate	PASS
B13	Recording timing	FAIL
B14	Wallet in order currency	PASS
B15	Discount-parity smoke	PARTIAL
B16	Soft Back keeps; hard reload / leave clears	FAIL (steps 1-2) / PASS (step 3)
B17	Pay with session 0 after leftover pending	NOT VERIFIED
B18	M-Pesa finalize without AccountReference	SKIPPED
B19	Admin "by" survives portal replace-0; portal "against" cleared	FAIL

Cross-cutting checklist

ID	Check	Result
C1	CRM Applicable == Portal after ship bump	PASS
C2	KES + USD paths consistent	PASS
C6	Session leave / hard refresh clears; payment commits once	FAIL

C7	W_final = L - U after earn+redeem	**FAIL**
C8	Rewards Used only after successful redemption	**FAIL**
C9	Soft Back keeps pending; hard refresh / other routes clear	**FAIL**
C10	Remaining "up to" drops by pending; X restores	**FAIL**
C11	No leftover bulk applied flipped to used	**NOT VERIFIED**
Master	Master happy path (one sitting)	**PARTIAL - blocked by bug 1**

Case details

B1 - Session ephemeral FAIL

Steps performed	On A1158 applied $60 (pending Applied row in CRM), then did a full reload of the invoice; then a second load. Also tried Ctrl+Shift+R.
Expected	Applied cleared; payable restored; no used row; wallet unchanged.
Actual	First full reload showed the widget reset but totals still -$60 / $940 (CRM row already removed); second load cleared to $1,000. Wallet unchanged. Ctrl+Shift+R did not reload the SPA.
Result	**FAIL**

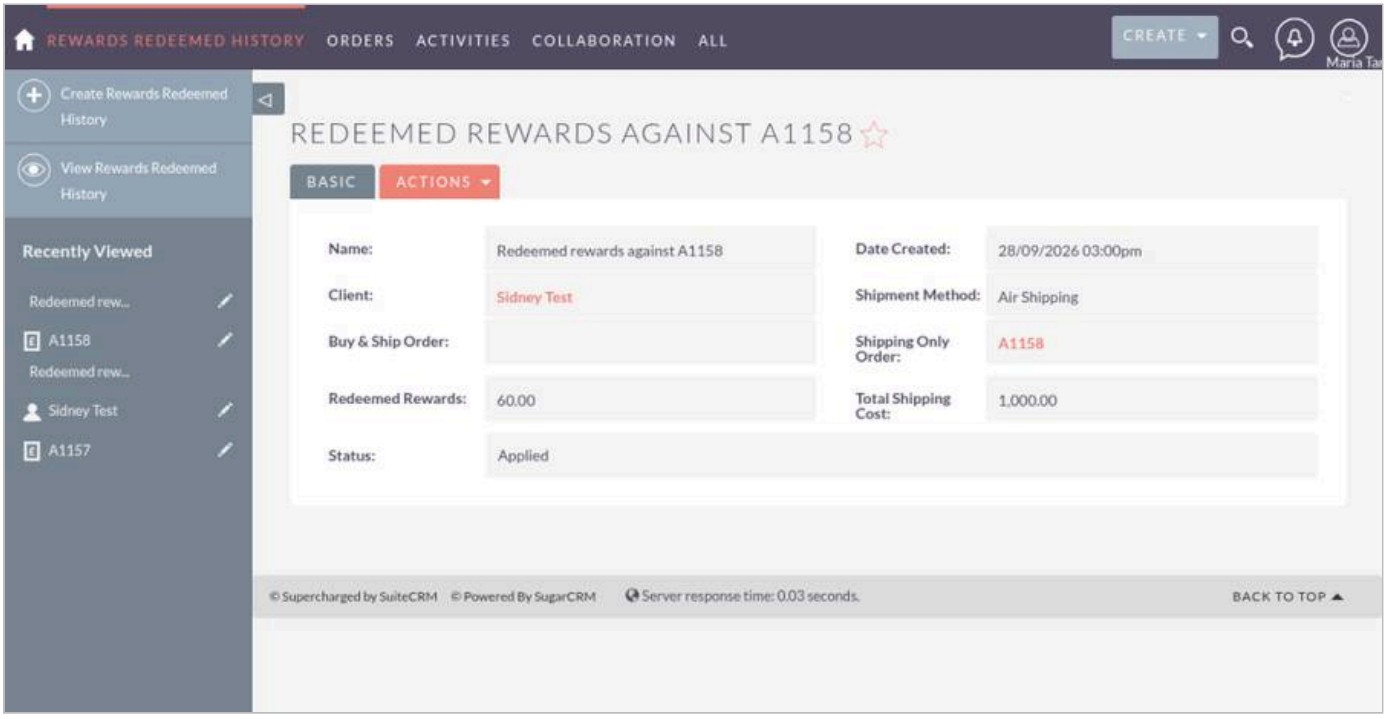

Fig. 2 - `b-07-b1-crm-pending-60-applied.png`: B1 crm pending 60 applied

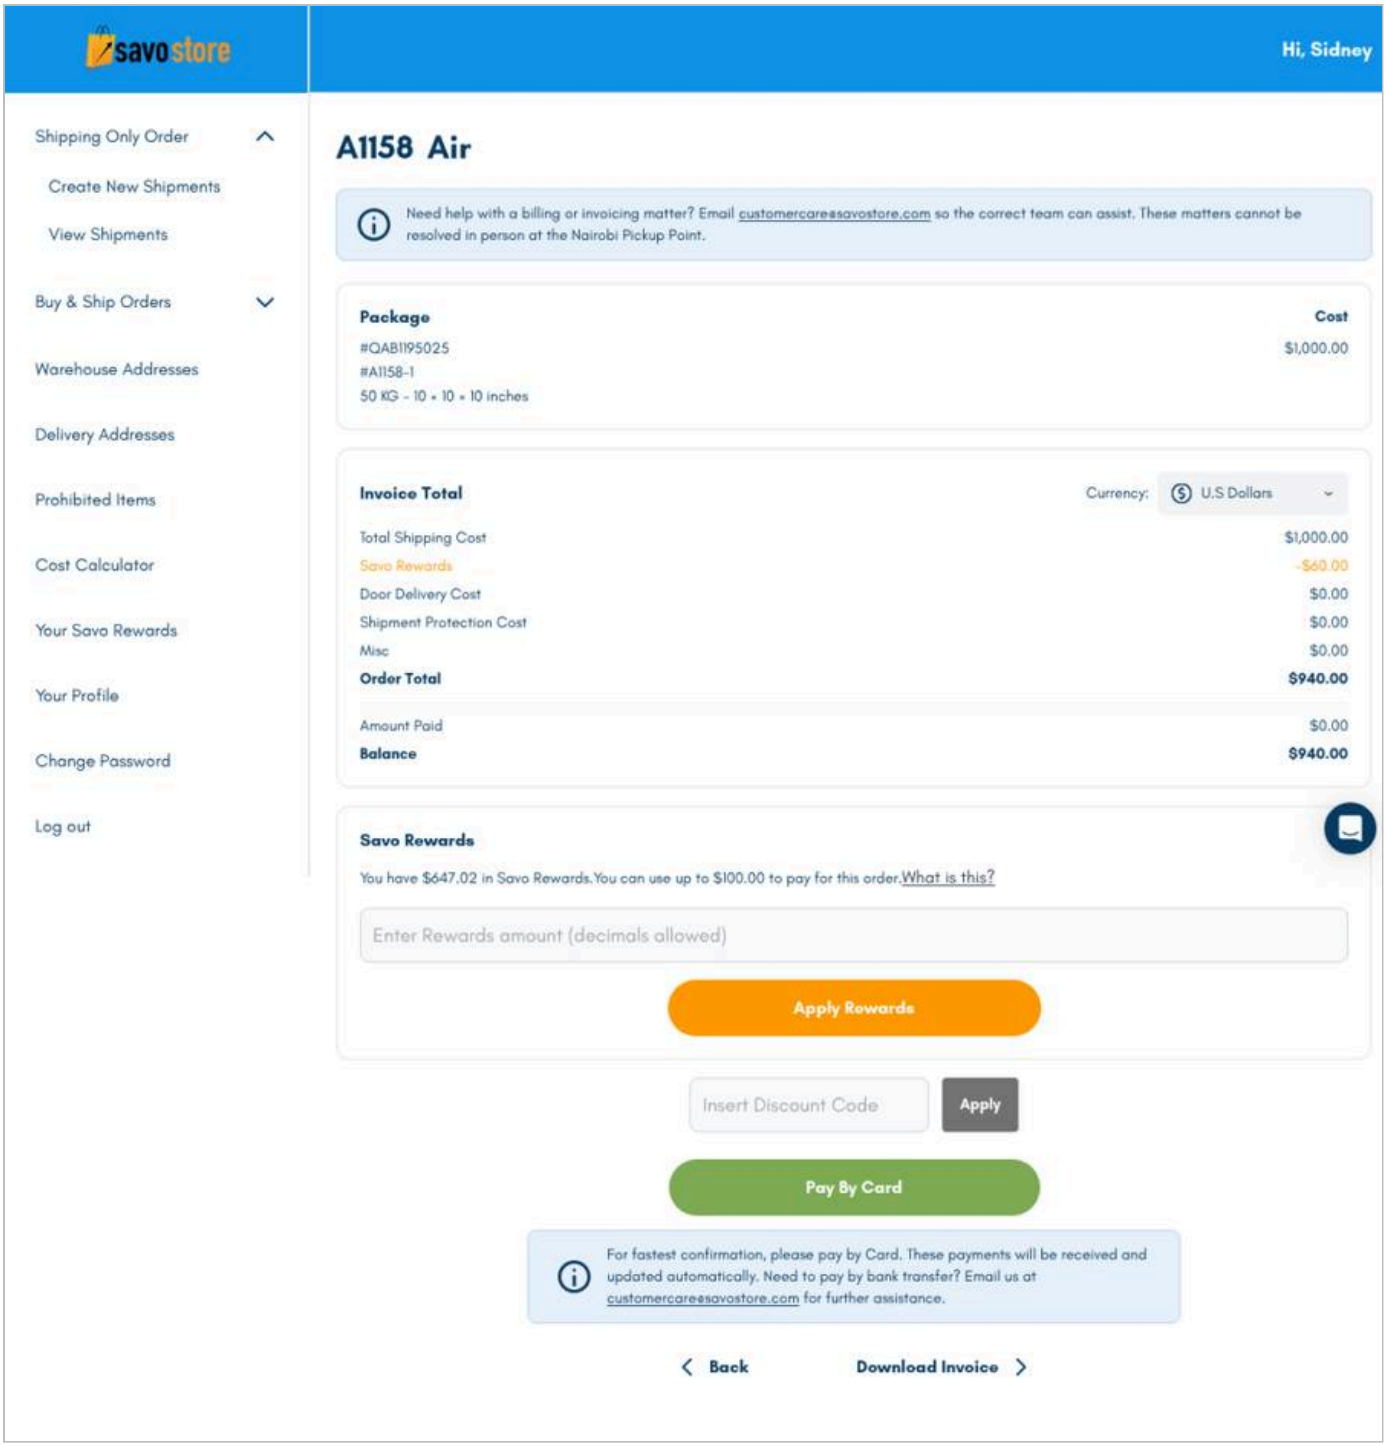

Fig. 3 - `b-08-b1-after-reload.png`: After first full reload: input cleared, but totals still show Savo Rewards -$60 / Order Total $940

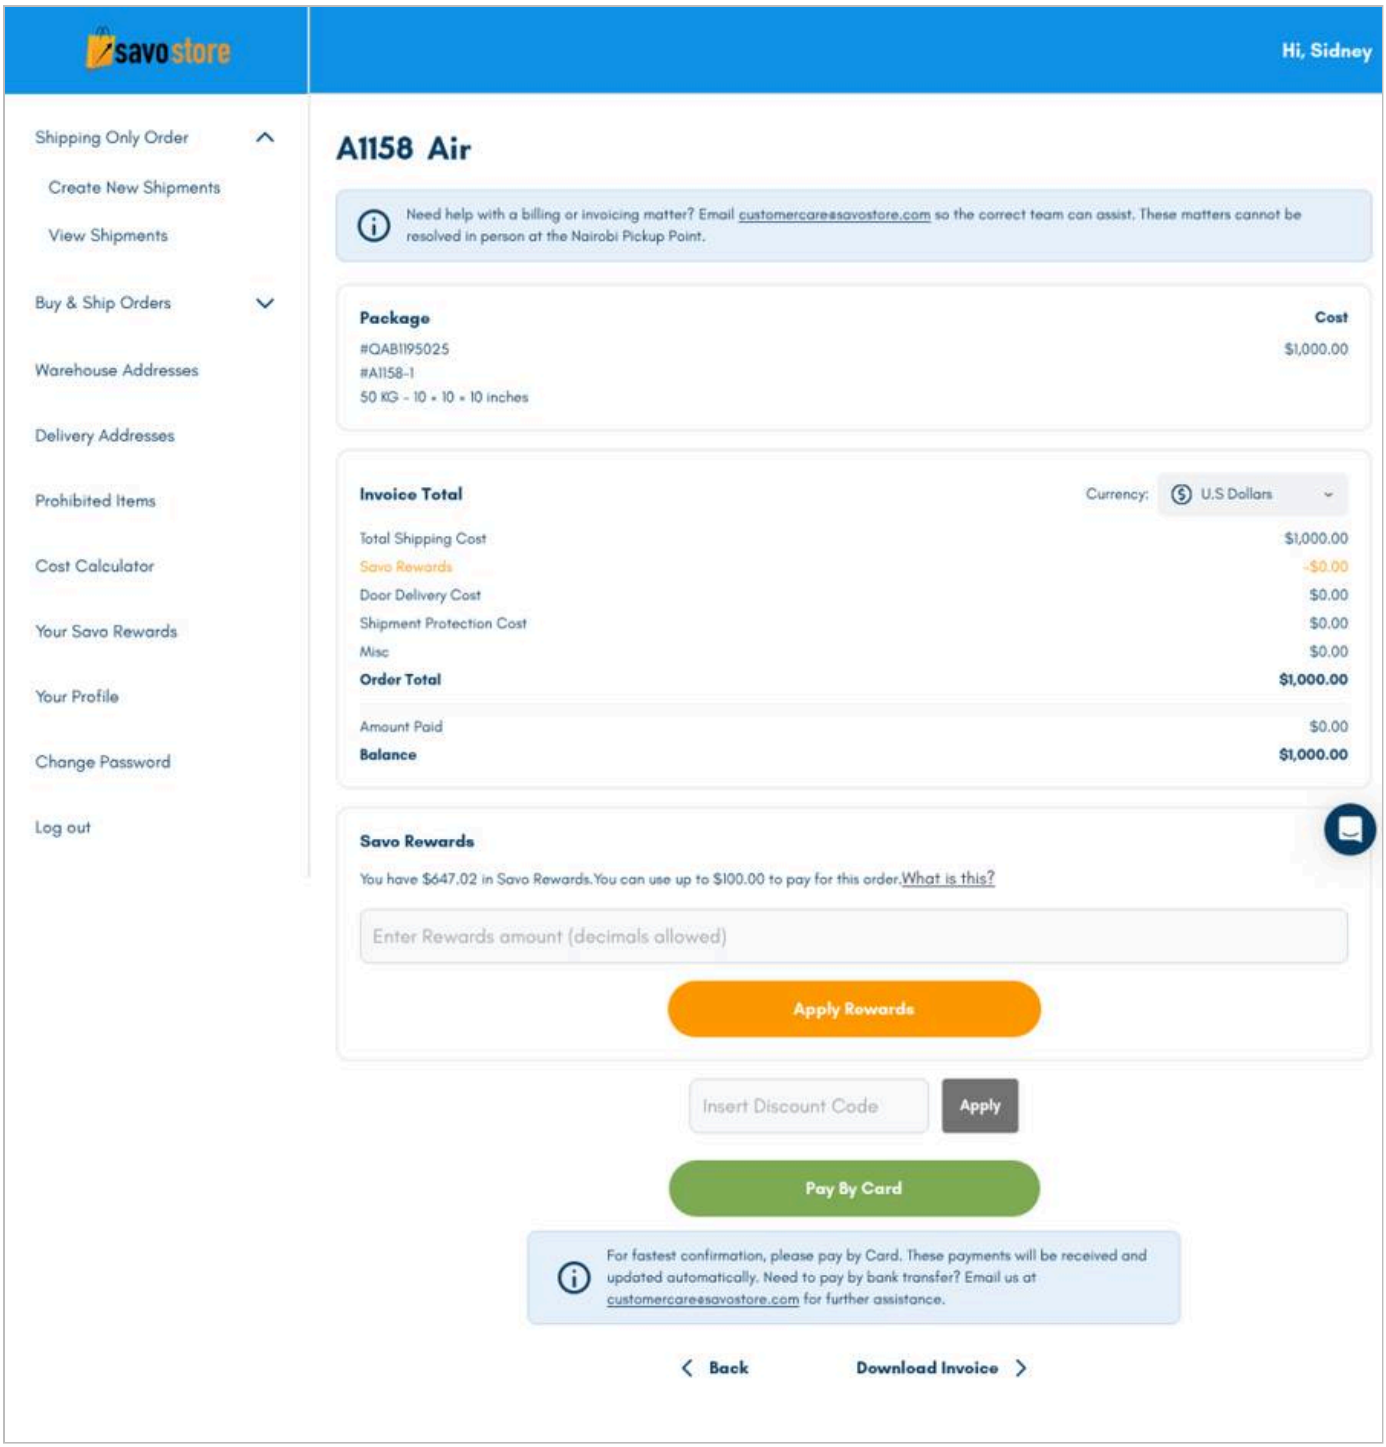

Fig. 4 - `b-09-b1-second-reload-1000.png`: B1 second reload 1000

B2 - X clears and restores Applicable PARTIAL

Steps performed	Applied 30 on A1158, clicked X, re-applied.
Expected	Payable original; "up to" back to M; re-apply works; no used.
Actual	X restores payable $1,000 and "up to $100"; re-apply works; no used row. But the "You have $X" line shows $617.02 (30 subtracted) until the next apply. Same seen on A1158 ($537.02) and B1461 (KES 57,633).
Result	PARTIAL

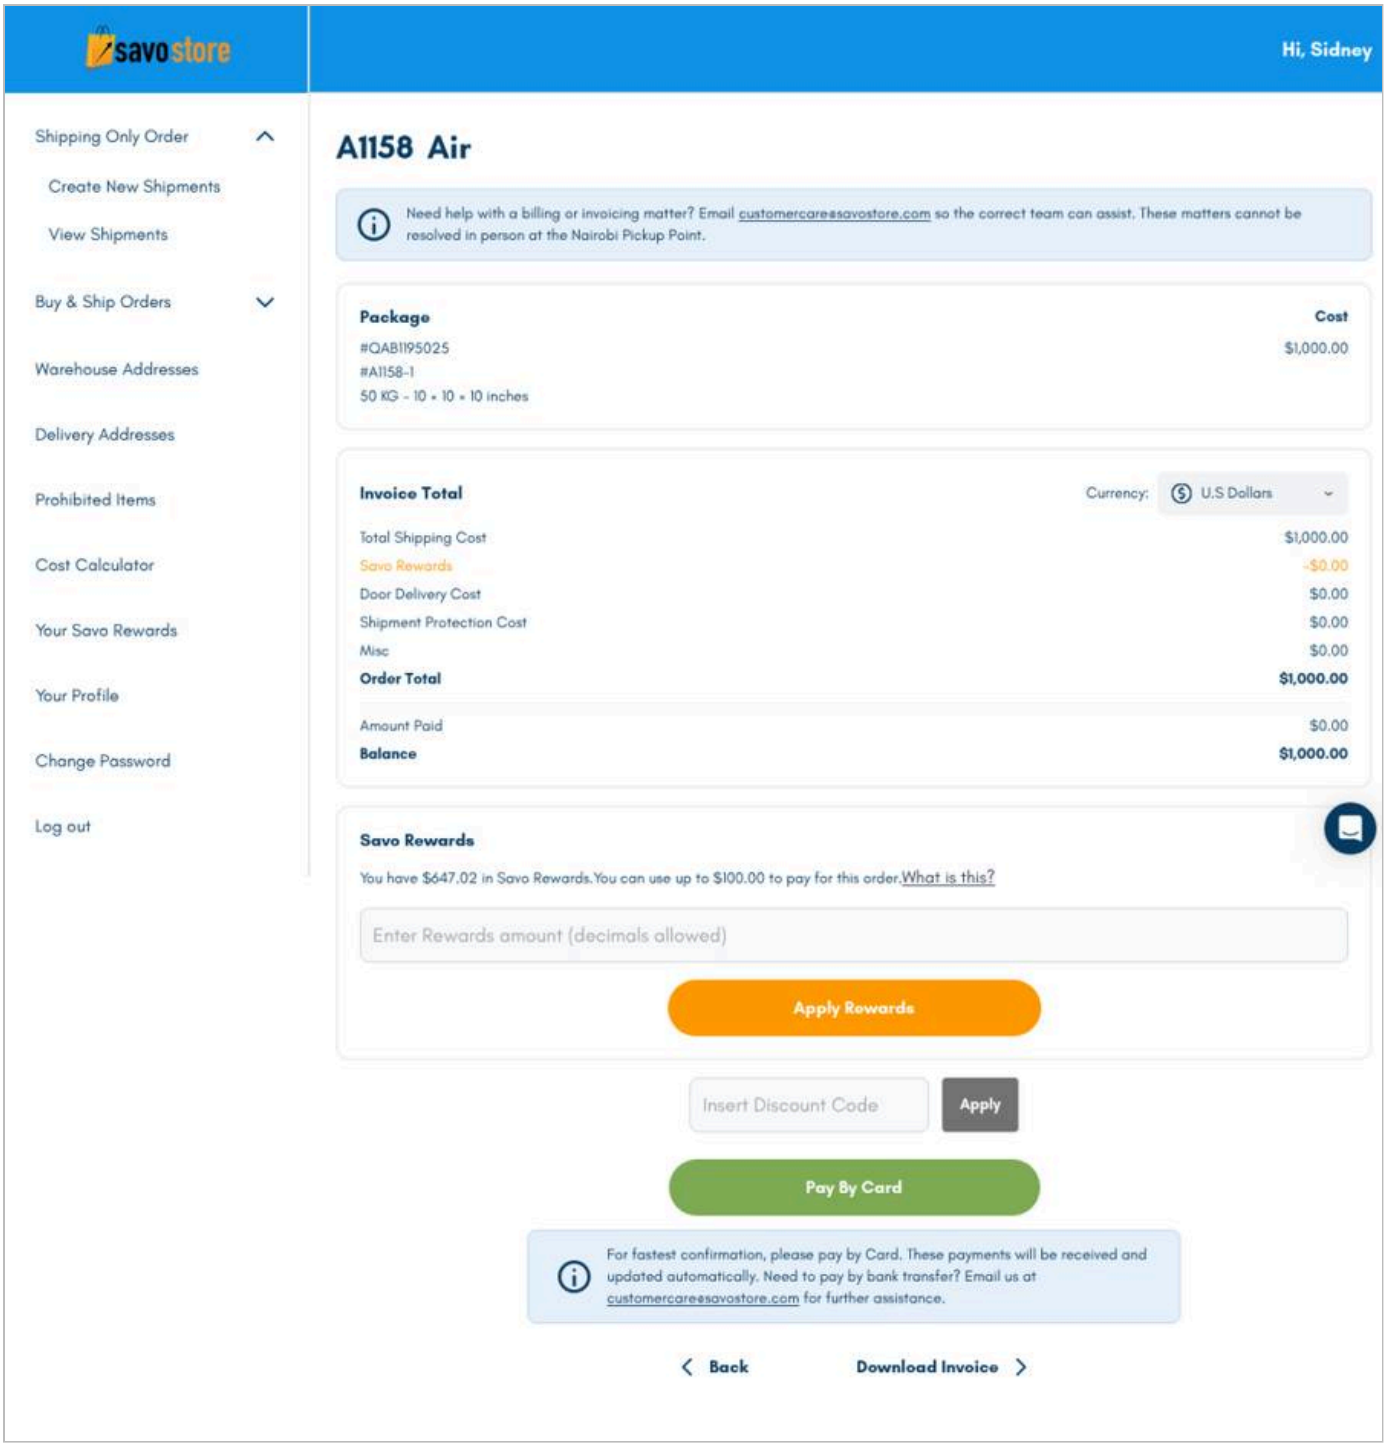

Fig. 5 - `b-01-invoice-baseline.png`: Invoice baseline

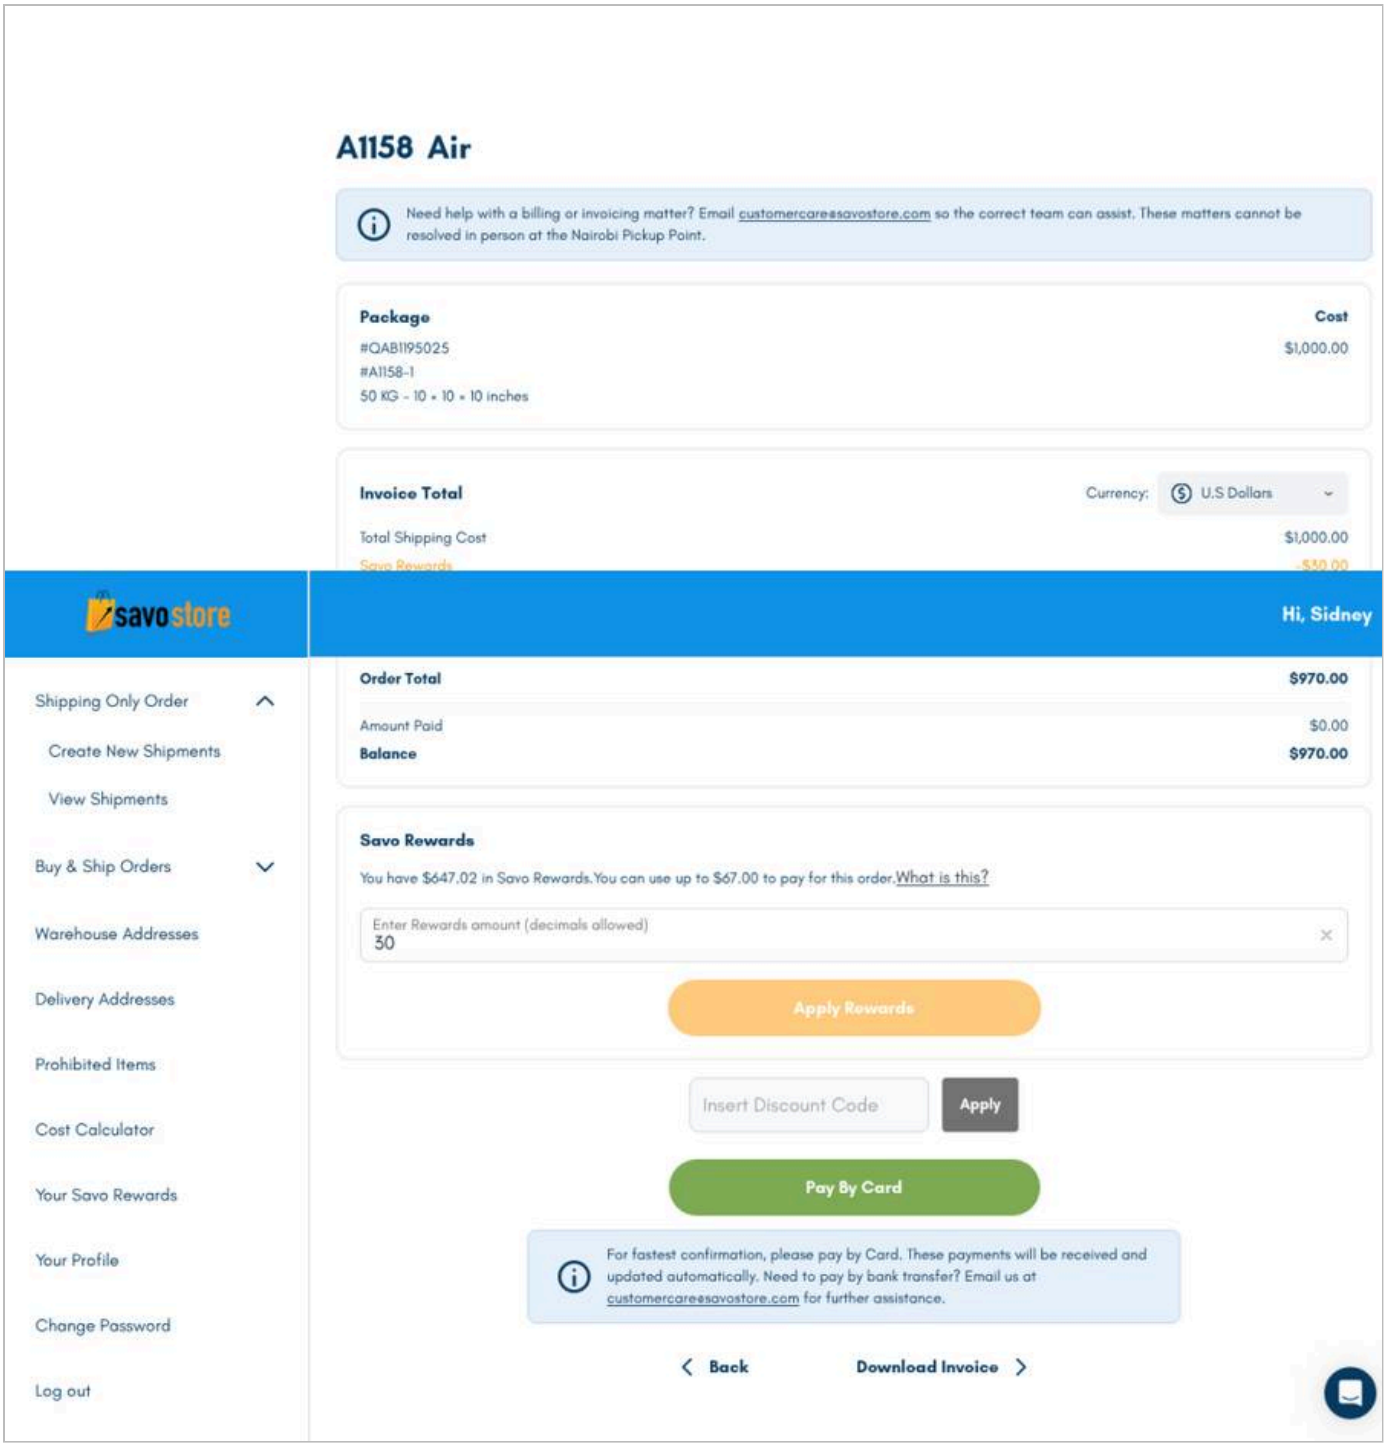

Fig. 6 - `b-02-b2-apply-30.png`: B2 apply 30

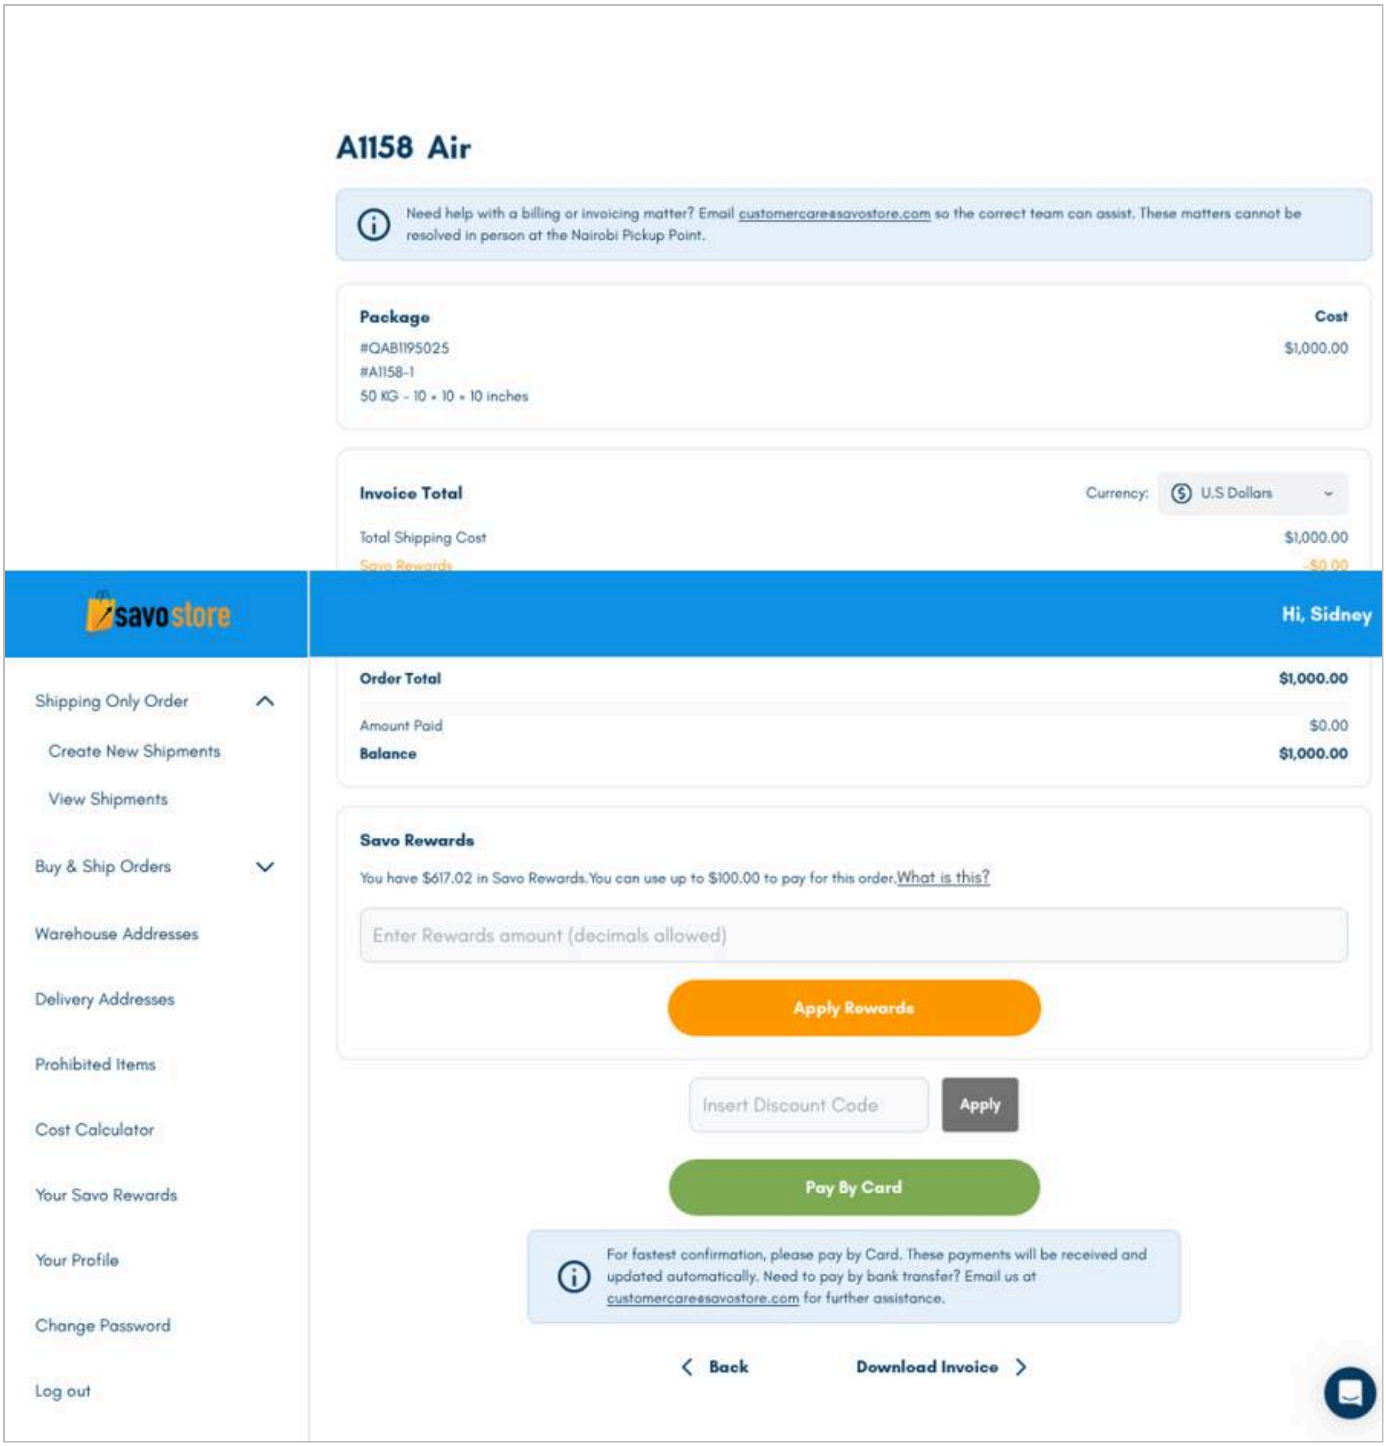

Fig. 7 - `b-03-b2-x-cleared.png`: B2 x cleared

B3 - Below-max succeeds; remaining copy drops FAIL

Steps performed	Max 100; applied 60.
Expected	Accepted; "up to" = 100 - 60 = 40.
Actual	Apply 60 accepted (no limit error) but "up to" shows $34 (10% of 940 - 60) instead of 40.
Result	FAIL

See also: Fig. 2 (b-07-b1-crm-pending-60-applied.png, in #165177 B1)

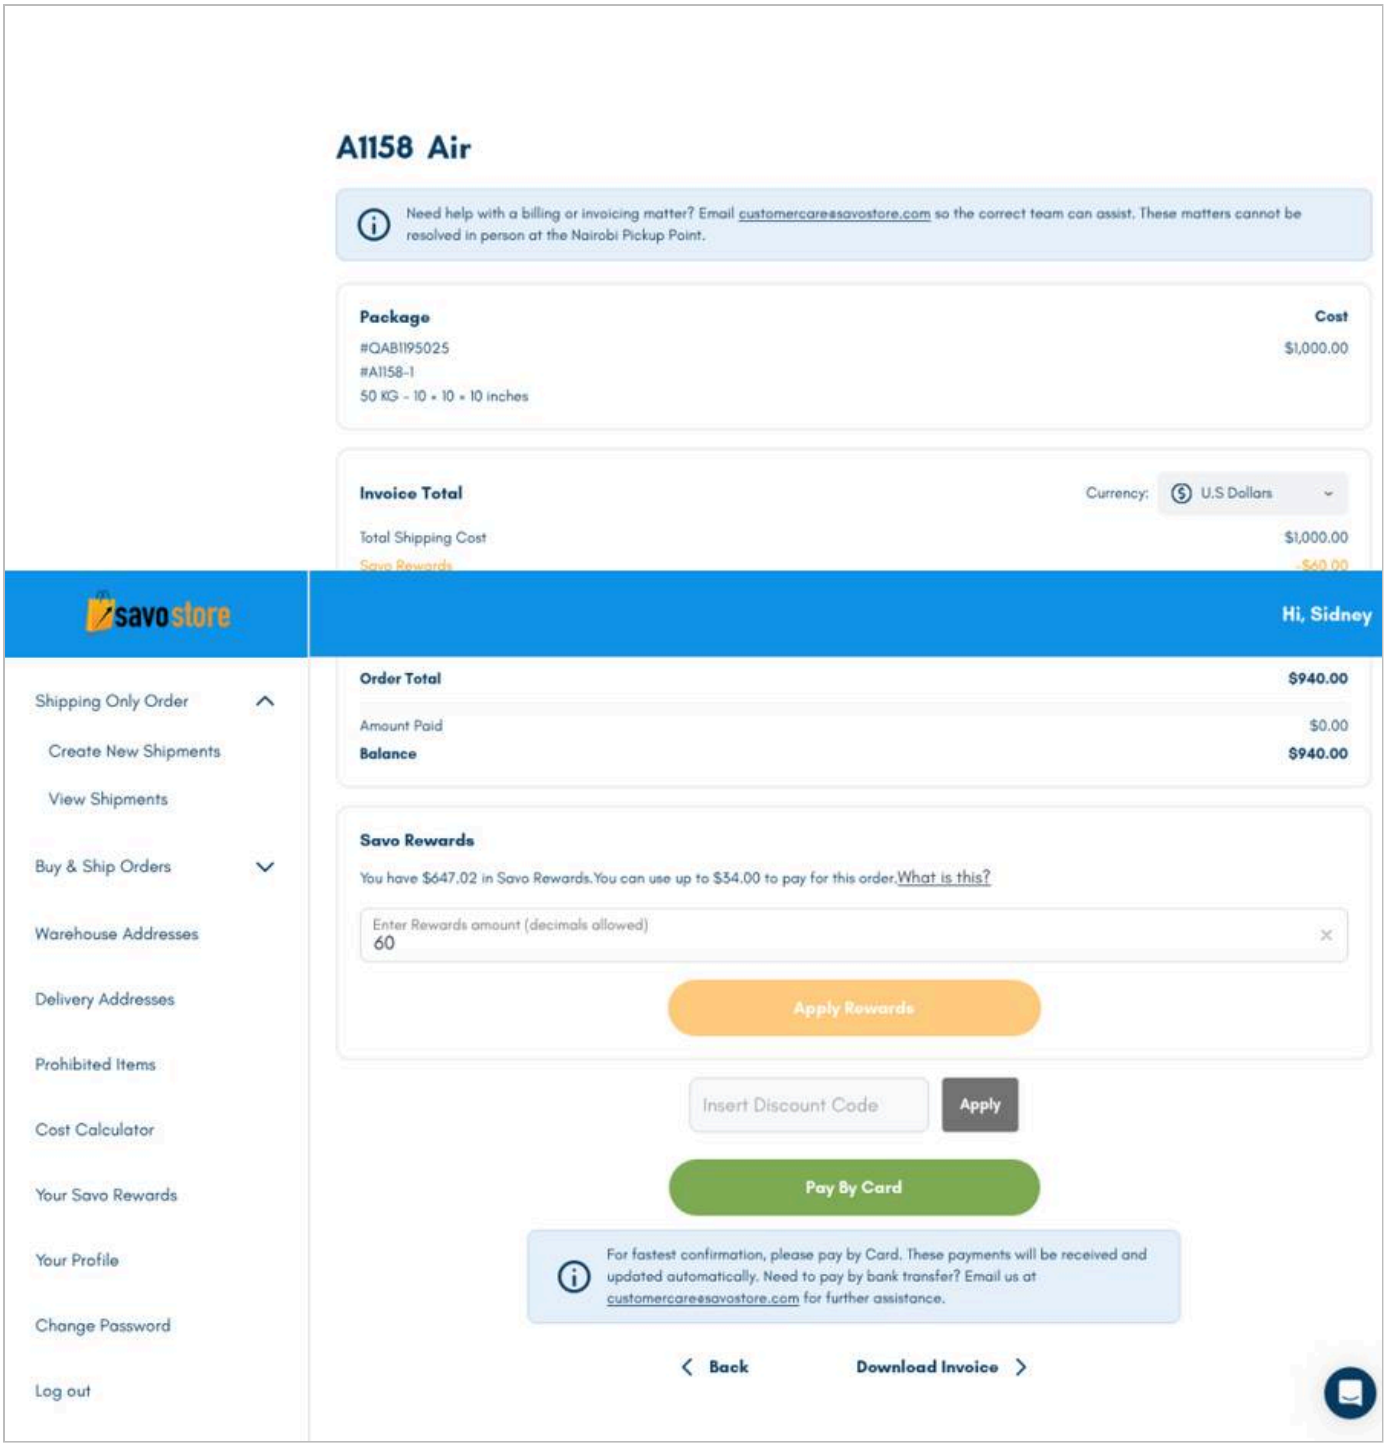

Fig. 8 - `b-06-b3-apply-60.png`: B3 apply 60

B4 - Portal payable = Stripe PASS

Steps performed	Applied rewards and opened Stripe on several orders.
Expected	Stripe equals portal payable; CRM matches after pay.
Actual	Stripe sandbox amounts matched portal payable: $950, $905, $360, KES 869,080.
Result	PASS

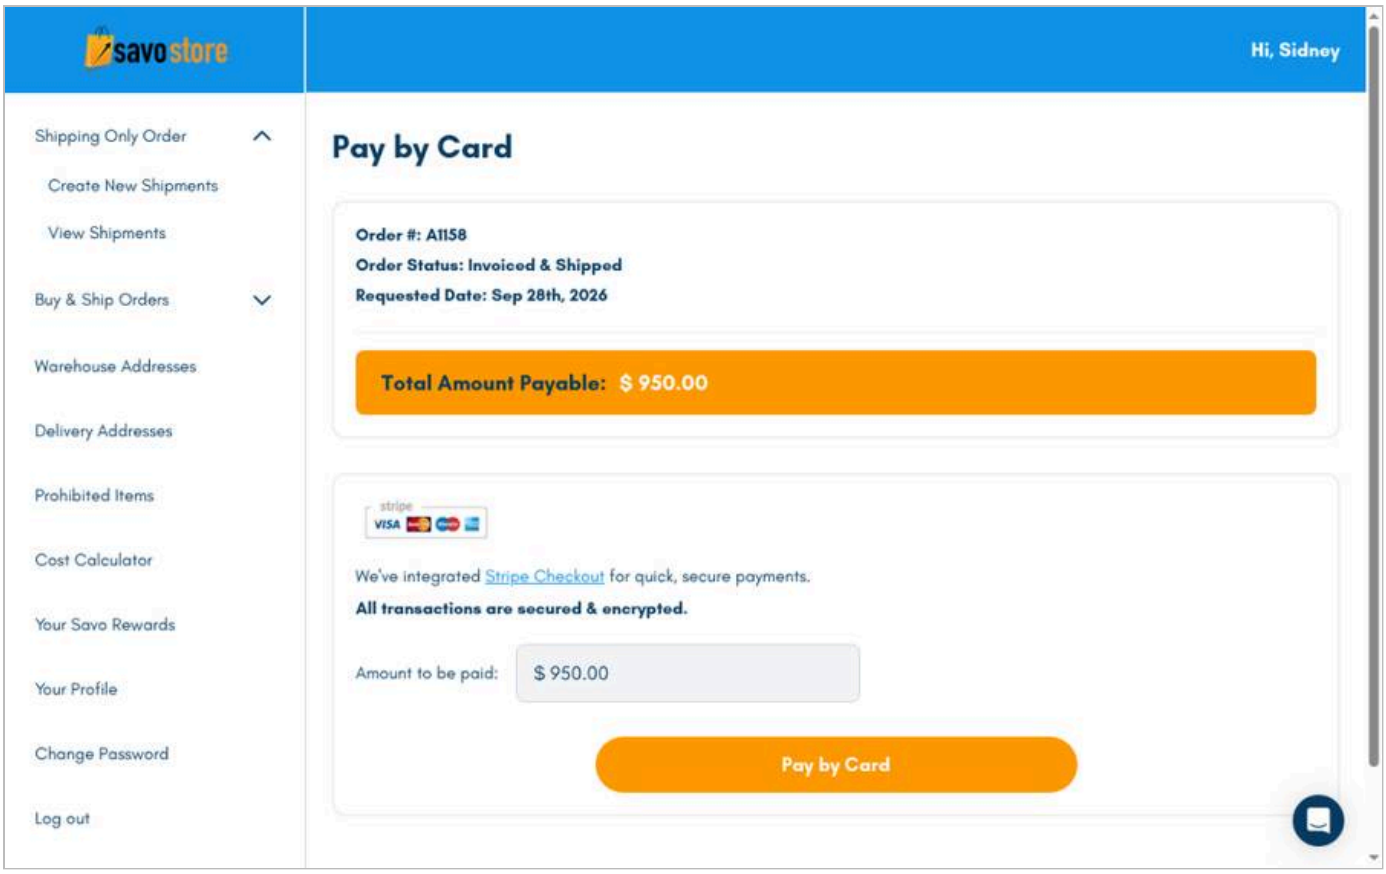

Fig. 9 - `b-12-b4-portal-pay-950.png`: B4 portal pay 950

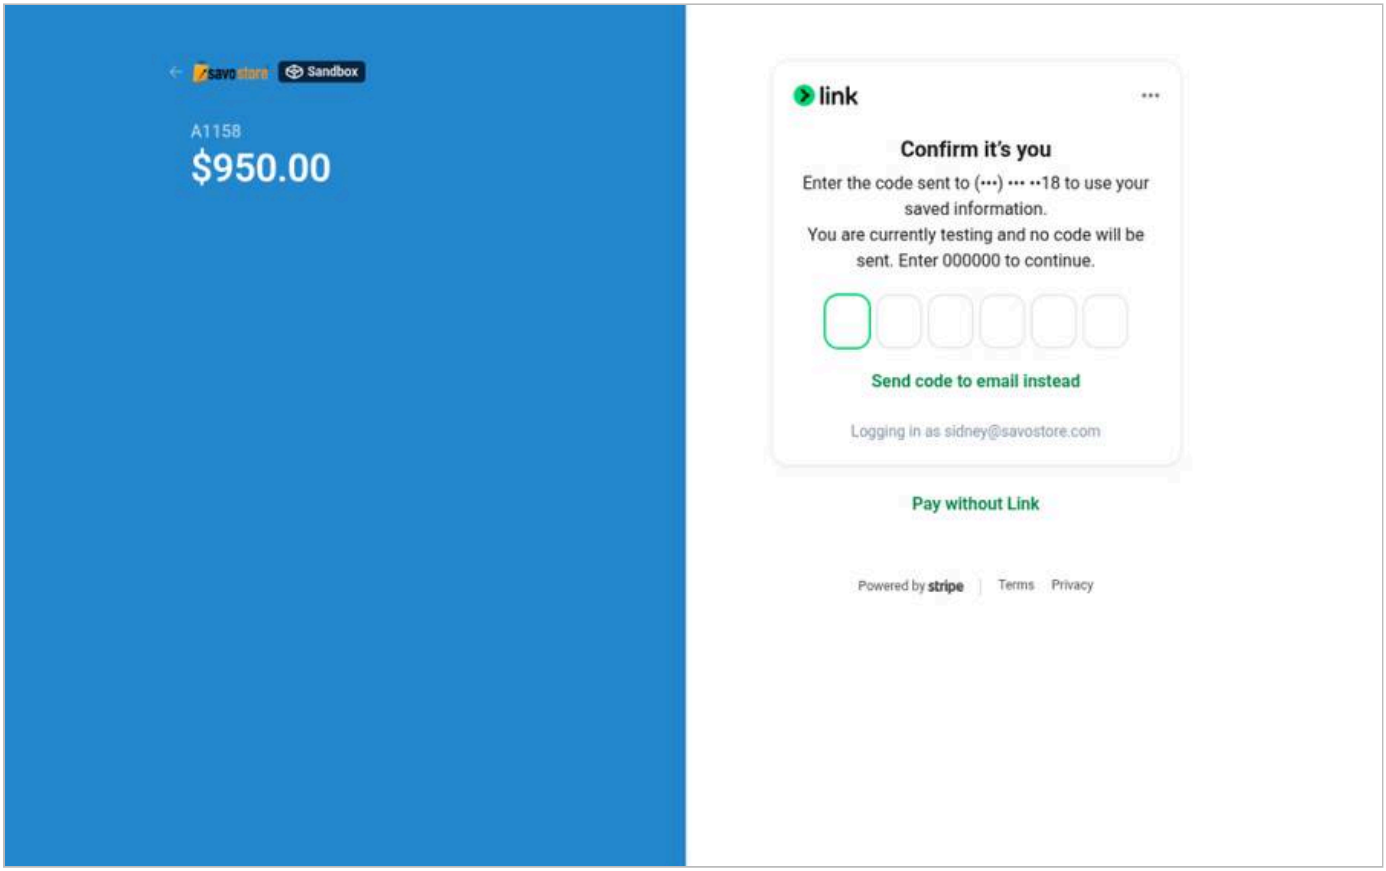

Fig. 10 - `b-13-b4-stripe-sandbox-950.png`: B4 stripe sandbox 950

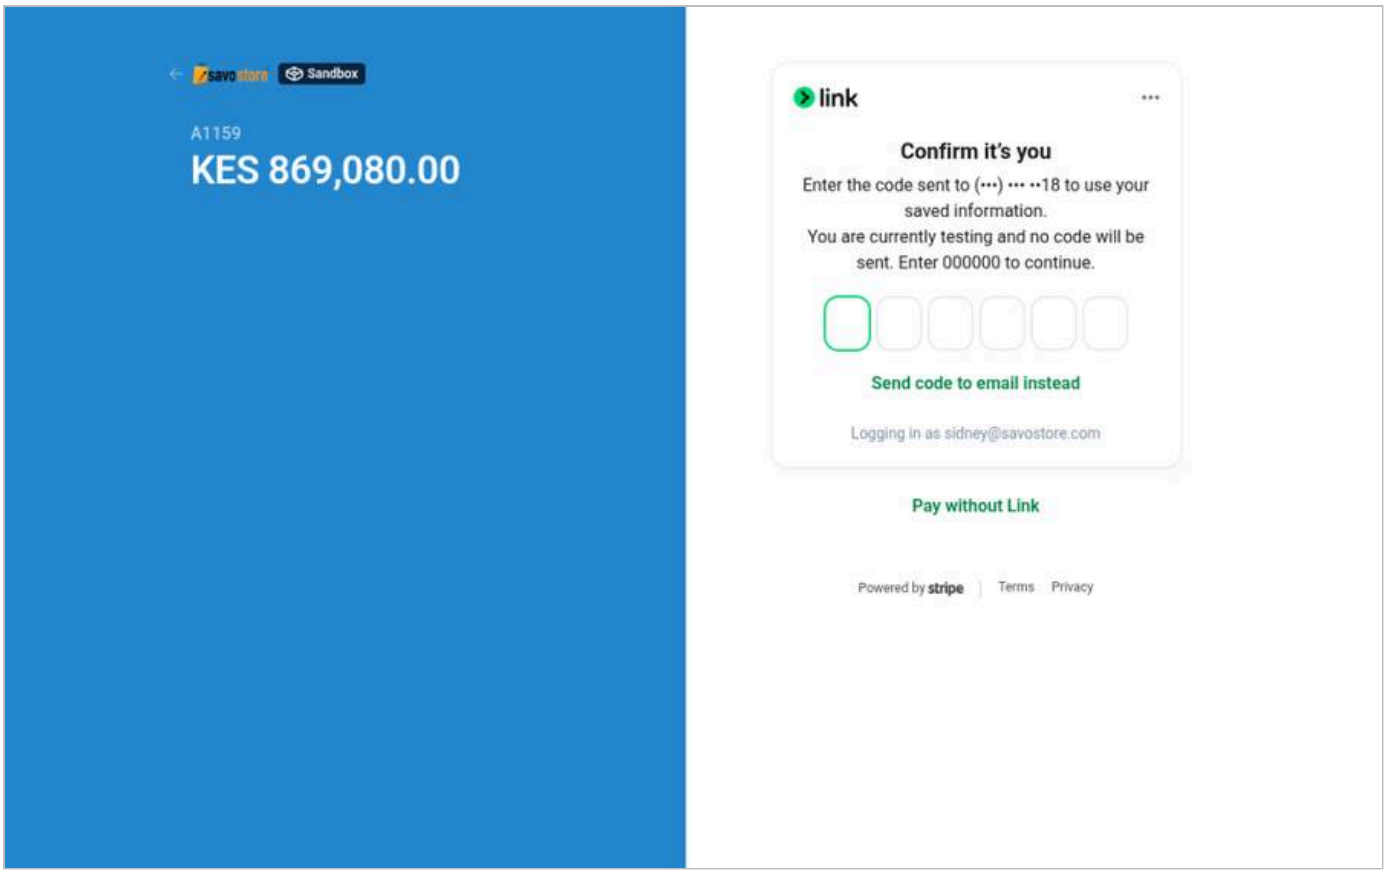

Fig. 14 - `d-06-stripe-sandbox-kes-869080.png`: Stripe sandbox kes 869080

B5 - Commit only on success; no double deduct PARTIAL

Steps performed	Successful Stripe pay with 45 applied on A1158; reloads afterwards.
Expected	Wallet -once; one used row; Rewards Used row; totals sticky; no second deduction.
Actual	Successful pay deducted once, one used row per redemption, totals sticky, no double deduction on reloads. But the commit happens when checkout opens, not on success (bug 1).
Result	PARTIAL

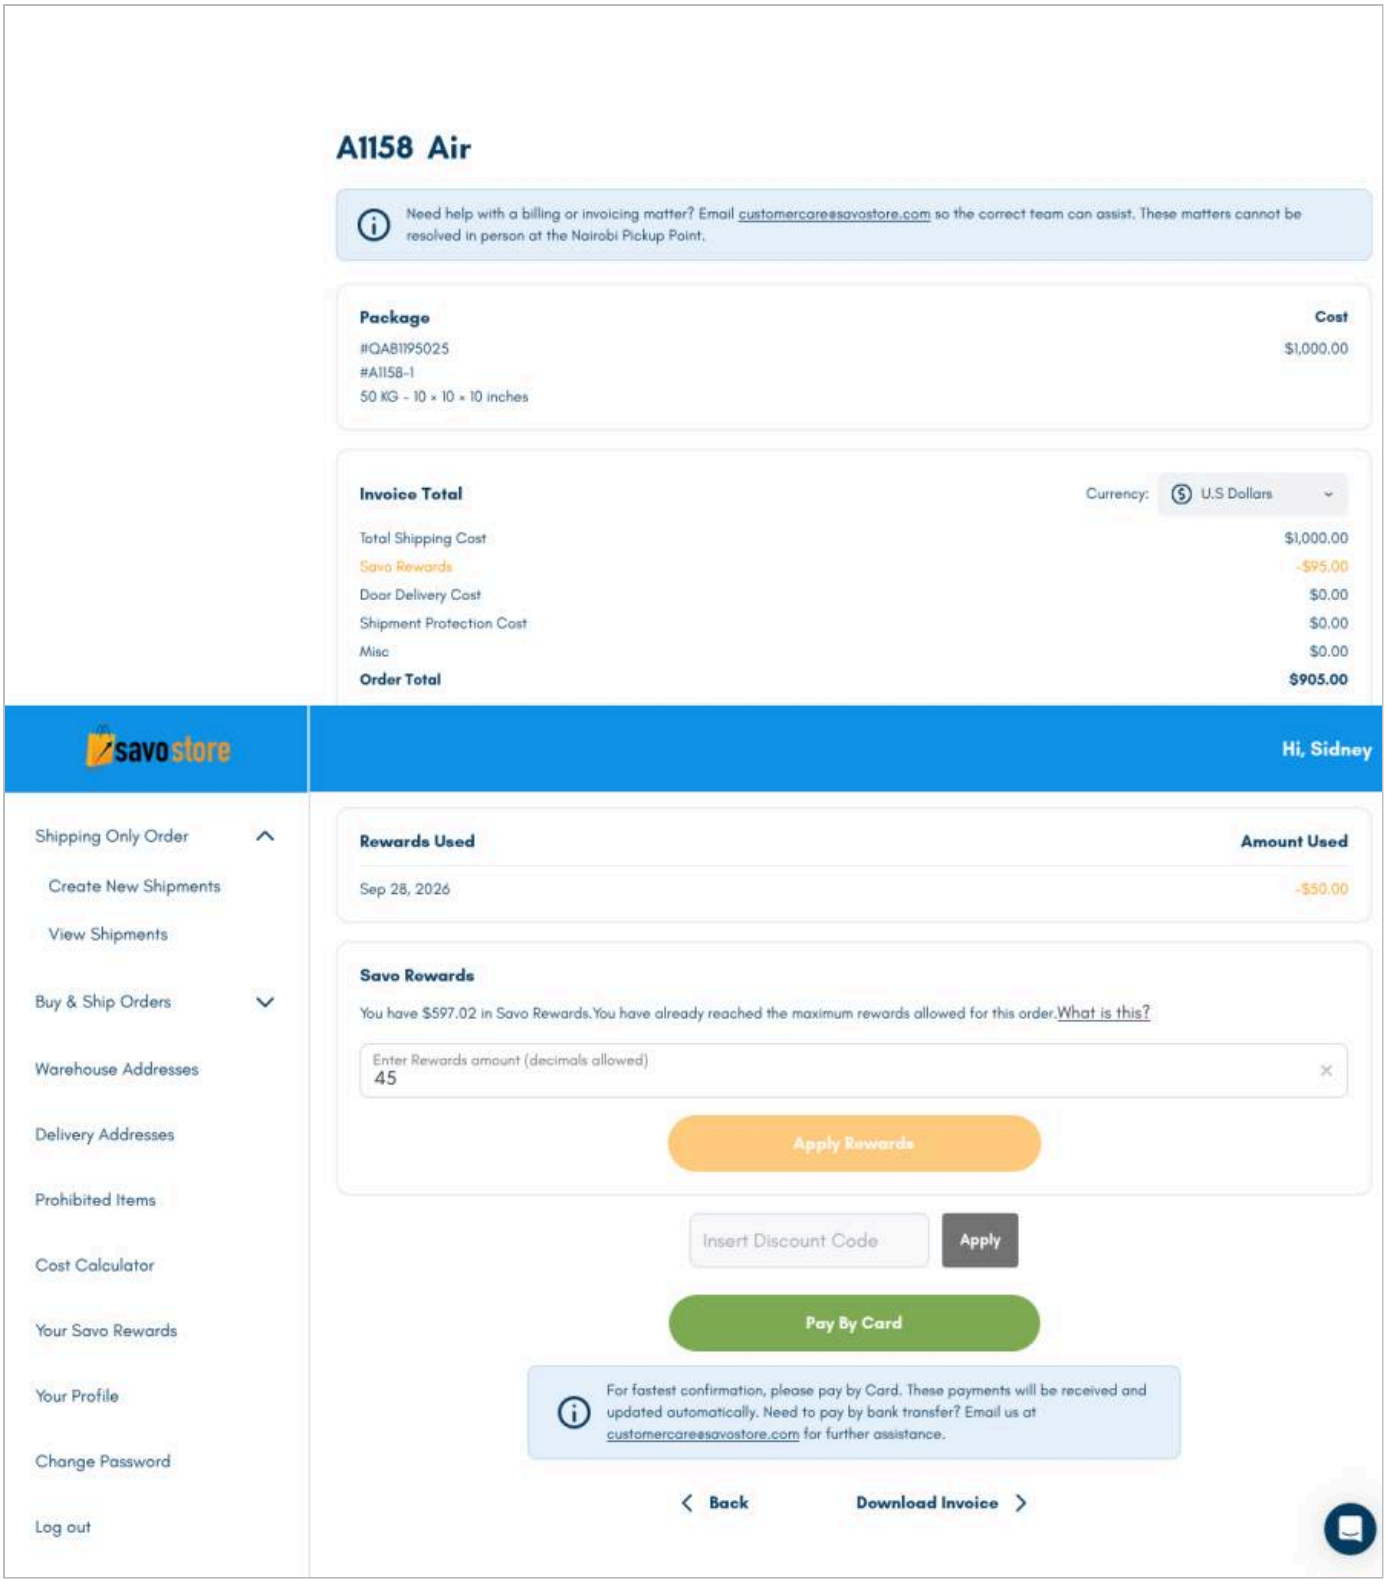

Fig. 15 - `a-05-portal-apply-45.png`: Portal apply 45

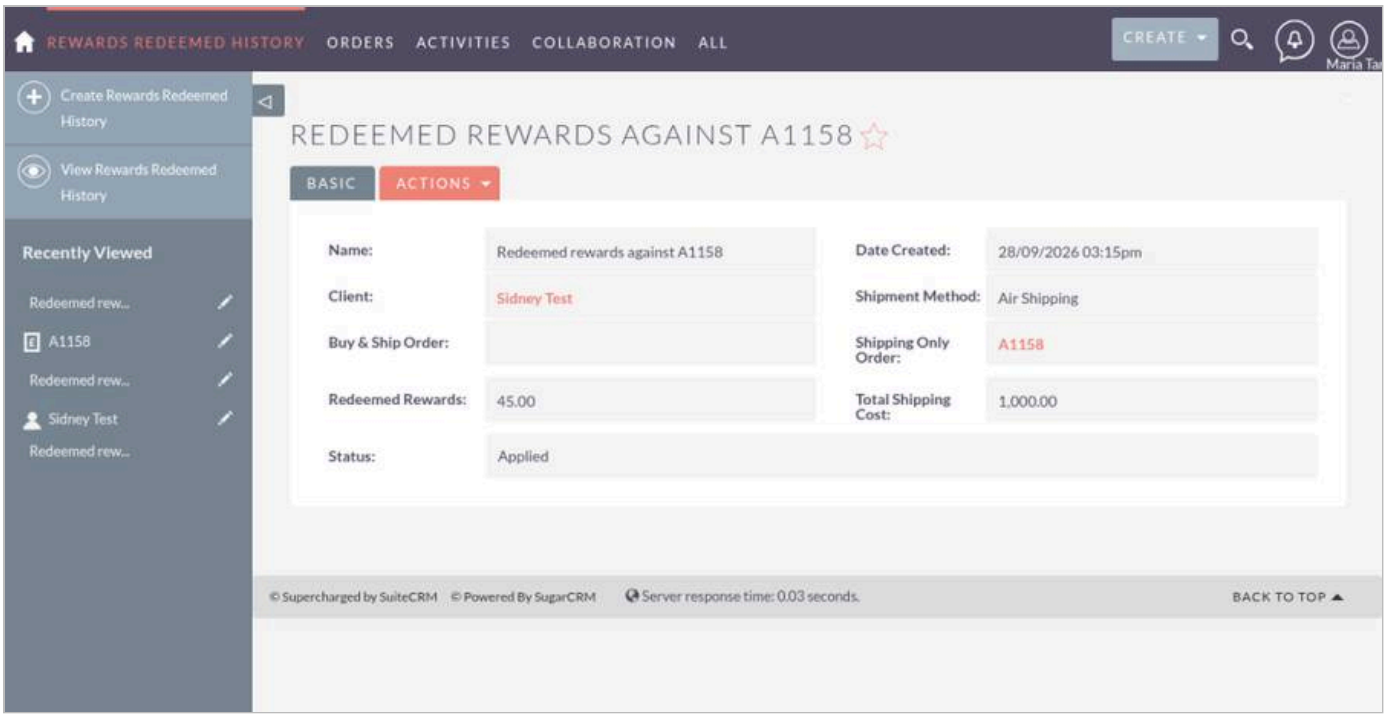

Fig. 16 - `a-06-crm-45-status-applied.png`: Crm 45 status applied

Fig. 20 - `a-13-contact-current-552-used-589.png`: Contact current 552 used 589

B6 - Failed / abandoned payment FAIL (CRITICAL)

Steps performed	On A1158 applied $50, opened Stripe, pressed Back without paying; checked CRM row, contact and portal history; reloaded.
Expected	Wallet unchanged; no used row; pending cleared on hard return/refresh.
Actual	CRM row "Redeemed rewards against A1158" went Applied -> Used. Current 647.02 -> 597.02, Used 494.13 -> 544.13. Portal history shows the redemption; reload does not release it.
Result	**FAIL (CRITICAL)**

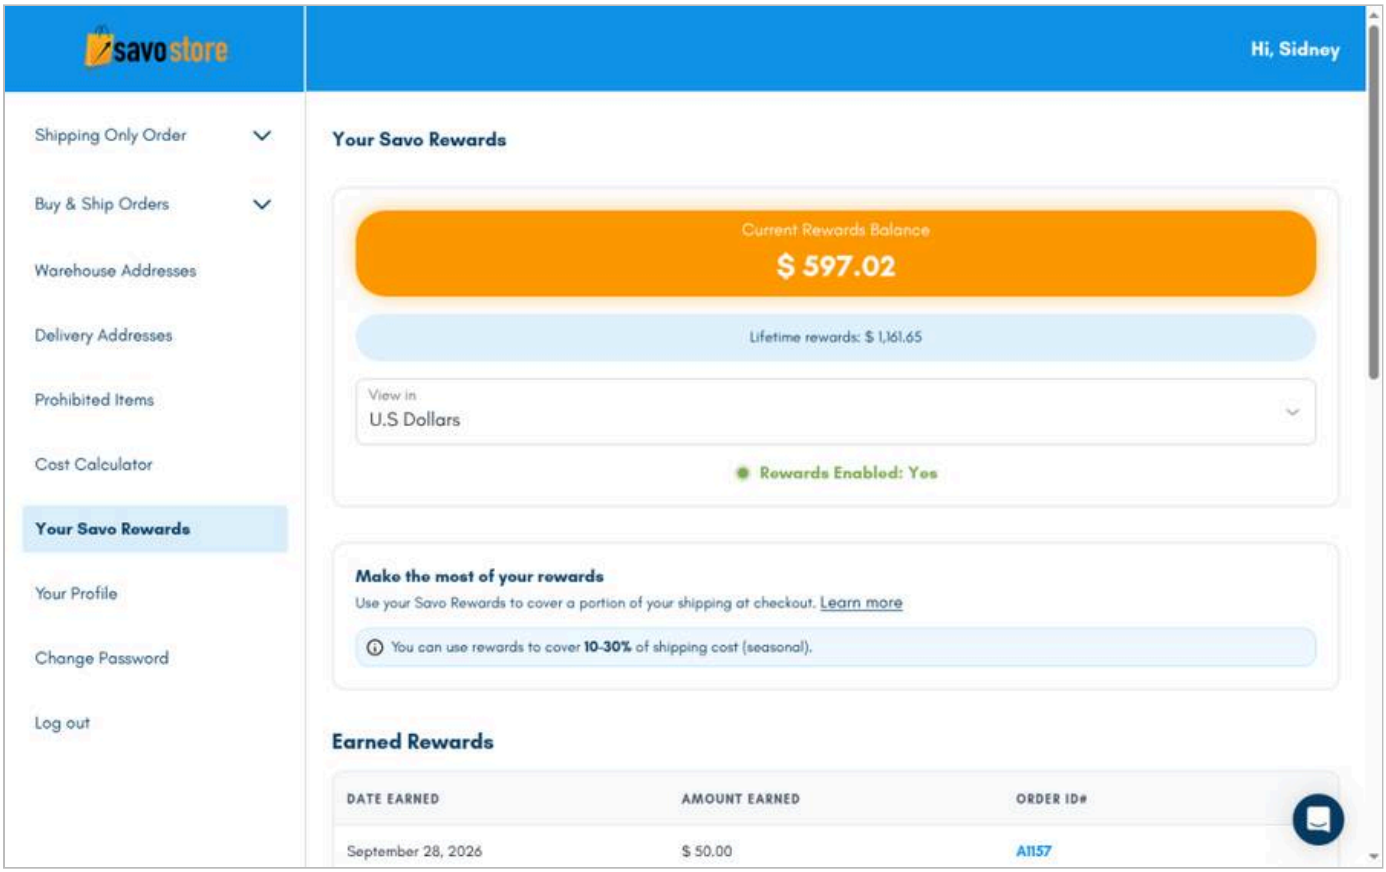

Fig. 25 - `b-22-portal-wallet-final-597.png`: Portal wallet final 597

B7 - Soft Back re-apply FAIL

Steps performed	After soft Back from Stripe (50 applied), tried to replace with 80.

Expected	Replacement validation = headroom + pending (up to 100); single pending row.
Actual	Soft Back keeps the $50, but it is already Used. Replacing with 80 blocked: "Rewards amount cannot exceed $45.00." Should allow replacement up to 100, and remaining should be 50, not 45.
Result	**FAIL**

See also: Fig. 21 (b-14-b7-back-keeps-50-950.png, in #165177 B6)

---

B8 - CRM Admin Rewards Redeemed (SO + BAS)

FAIL (mixed - several sub-checks pass)

Steps performed	On A1159 (KES) created Rewards Redeemed from the order subpanel; tried > Applicable; saved 14,000; checked order, contact, portal; customer then opened Stripe and paid.
Expected	Prefill Current + Applicable; Applicable = order max; save <= Applicable updates order + wallet; > Applicable blocked; subpanel in order currency; persists.
Actual	PASS: prefill (name "Redeemed rewards by Maria.tariq against A1159", Current, Applicable, Total Shipping Cost read-only); Applicable = order max in order currency (KES 71,683, not USD 512.02); > Applicable/wallet blocked "Redeemed rewards cannot exceed the contact's current rewards."; subpanel Ksh14,000; order Savo Rewards -14,000 and portal shows it. FAIL: row status stays Applied; contact wallet NOT deducted on save; Current dropped $100 only when the customer opened Stripe; Used never increased; status still Applied after full payment.
Result	**FAIL (mixed - several sub-checks pass)**

B9 - Total Shipping Cost on create PASS

Steps performed	Opened Rewards Redeemed Create on A1158 (before/after bump), A1159, B1461.
Expected	Read-only, from order shipping; not Grand Total.
Actual	Read-only and equal to order shipping (1,000 / 1,400 / 840,000 / 7,644), not Grand Total.
Result	PASS

See also: Fig. 28 (c-05-crm-create-applicable-71683.png, in #165177 B8)

B10 - Wallet integrity FAIL

Steps performed	Compared contact Current vs Total - Used at start and end.
Expected	Current = Lifetime - Used; no random jumps.
Actual	No random jumps, but Current != Lifetime - Used: pre-existing 20.50 gap, grew to 120.50 after the admin redemption flow. Final: Current 412.02, Total 1,161.65, Used 629.13.
Result	FAIL

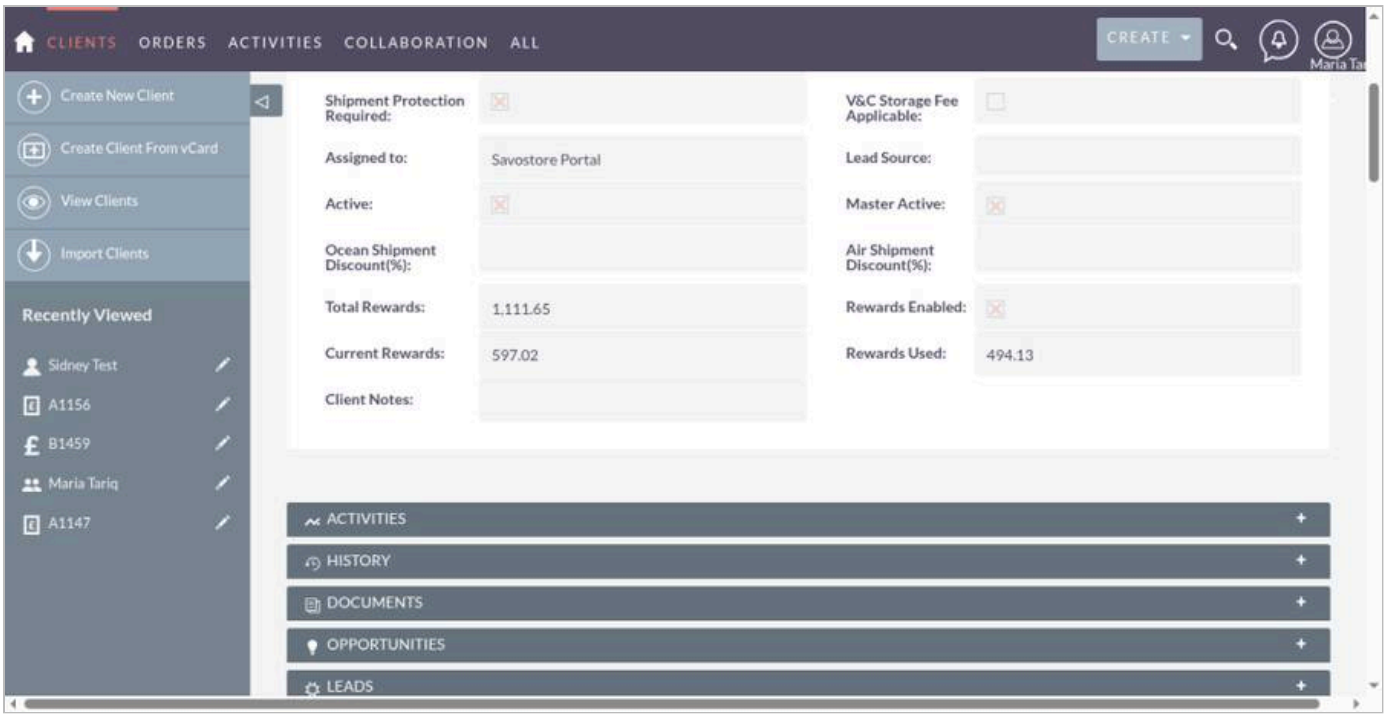

Fig. 53 - `e0-01-crm-rewards-baseline.png`: Crm rewards baseline

Fig. 54 - `d-26-contact-final-412-used-629.png`: Contact final 412 used 629

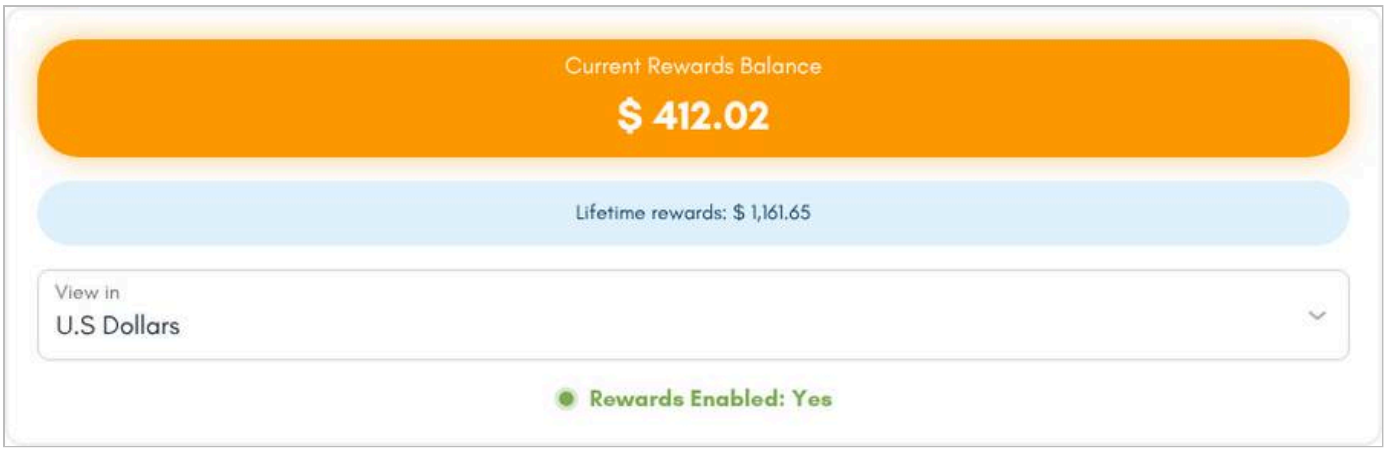

Fig. 56 - `d-28-portal-final-412-lifetime-1161.png`: Portal final 412 lifetime 1161

B11 - Portal success visible in CRM PASS

Steps performed	After portal Stripe pay with rewards, compared CRM and portal.
Expected	CRM field/subpanel/totals match; Rewards Used row.
Actual	CRM totals and subpanel match portal; history shows the redemption.
Result	PASS

See also: Fig. 19 (a-11-crm-after-pay-totals.png, in #165177 B5)

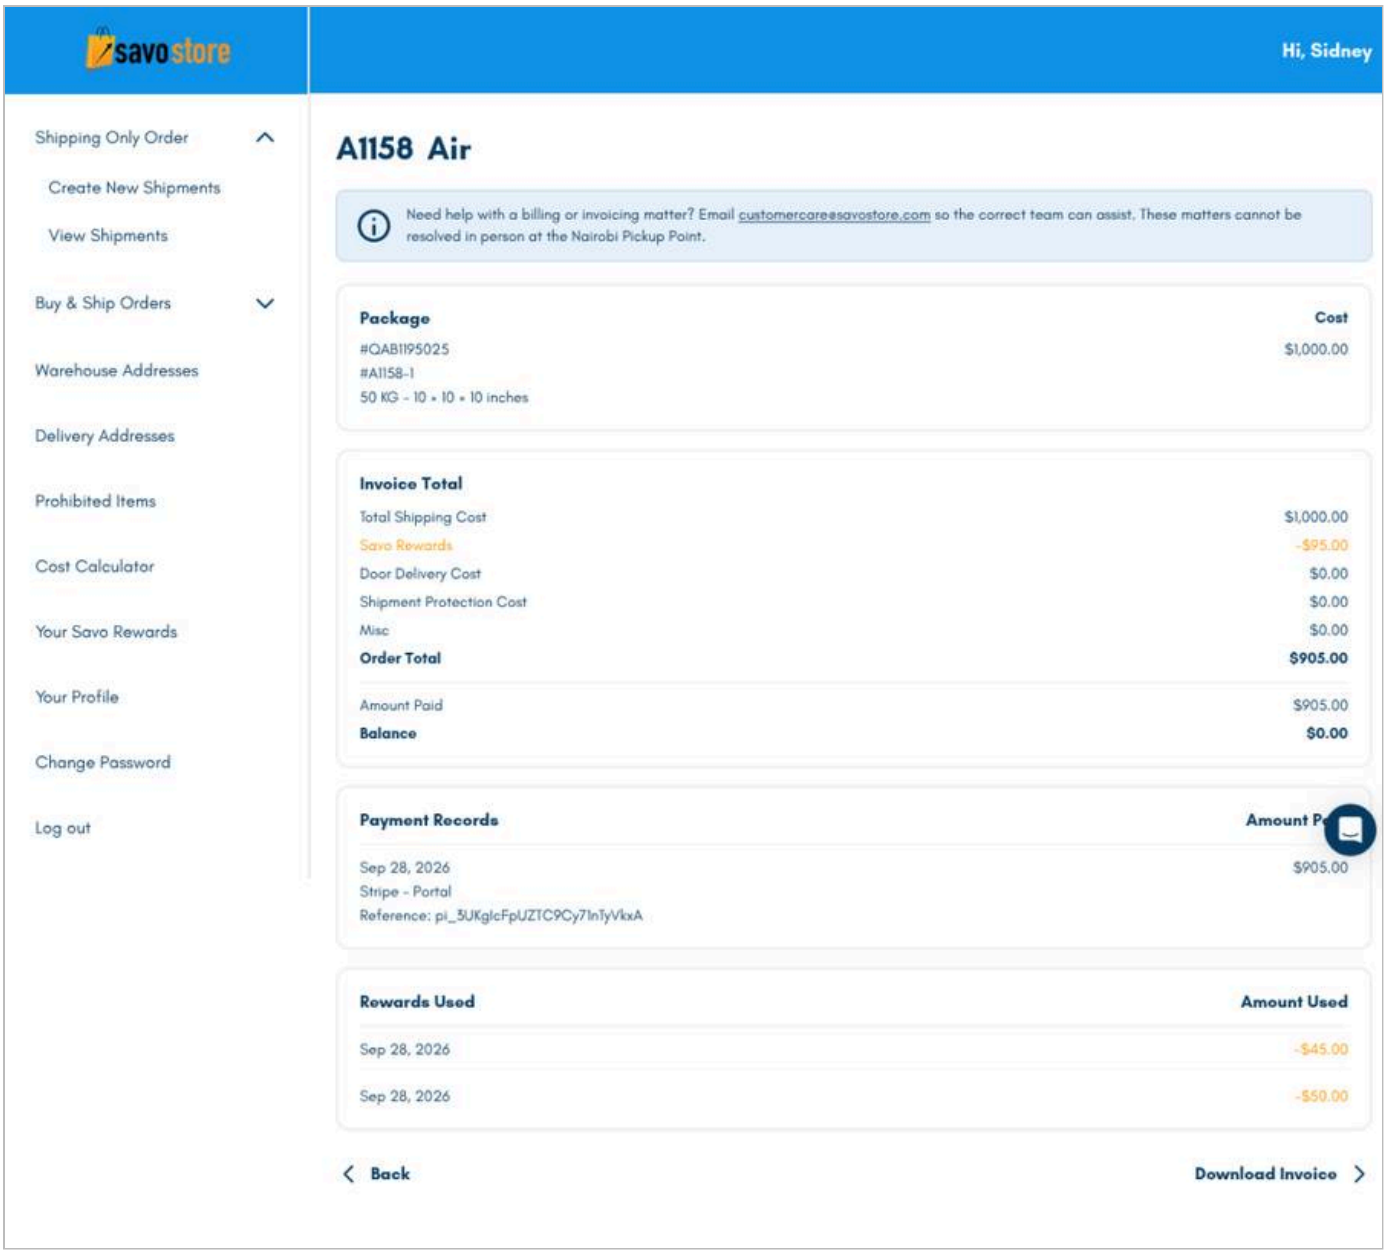

Fig. 57 - `a-14-portal-invoice-after-pay.png`: Portal invoice after pay

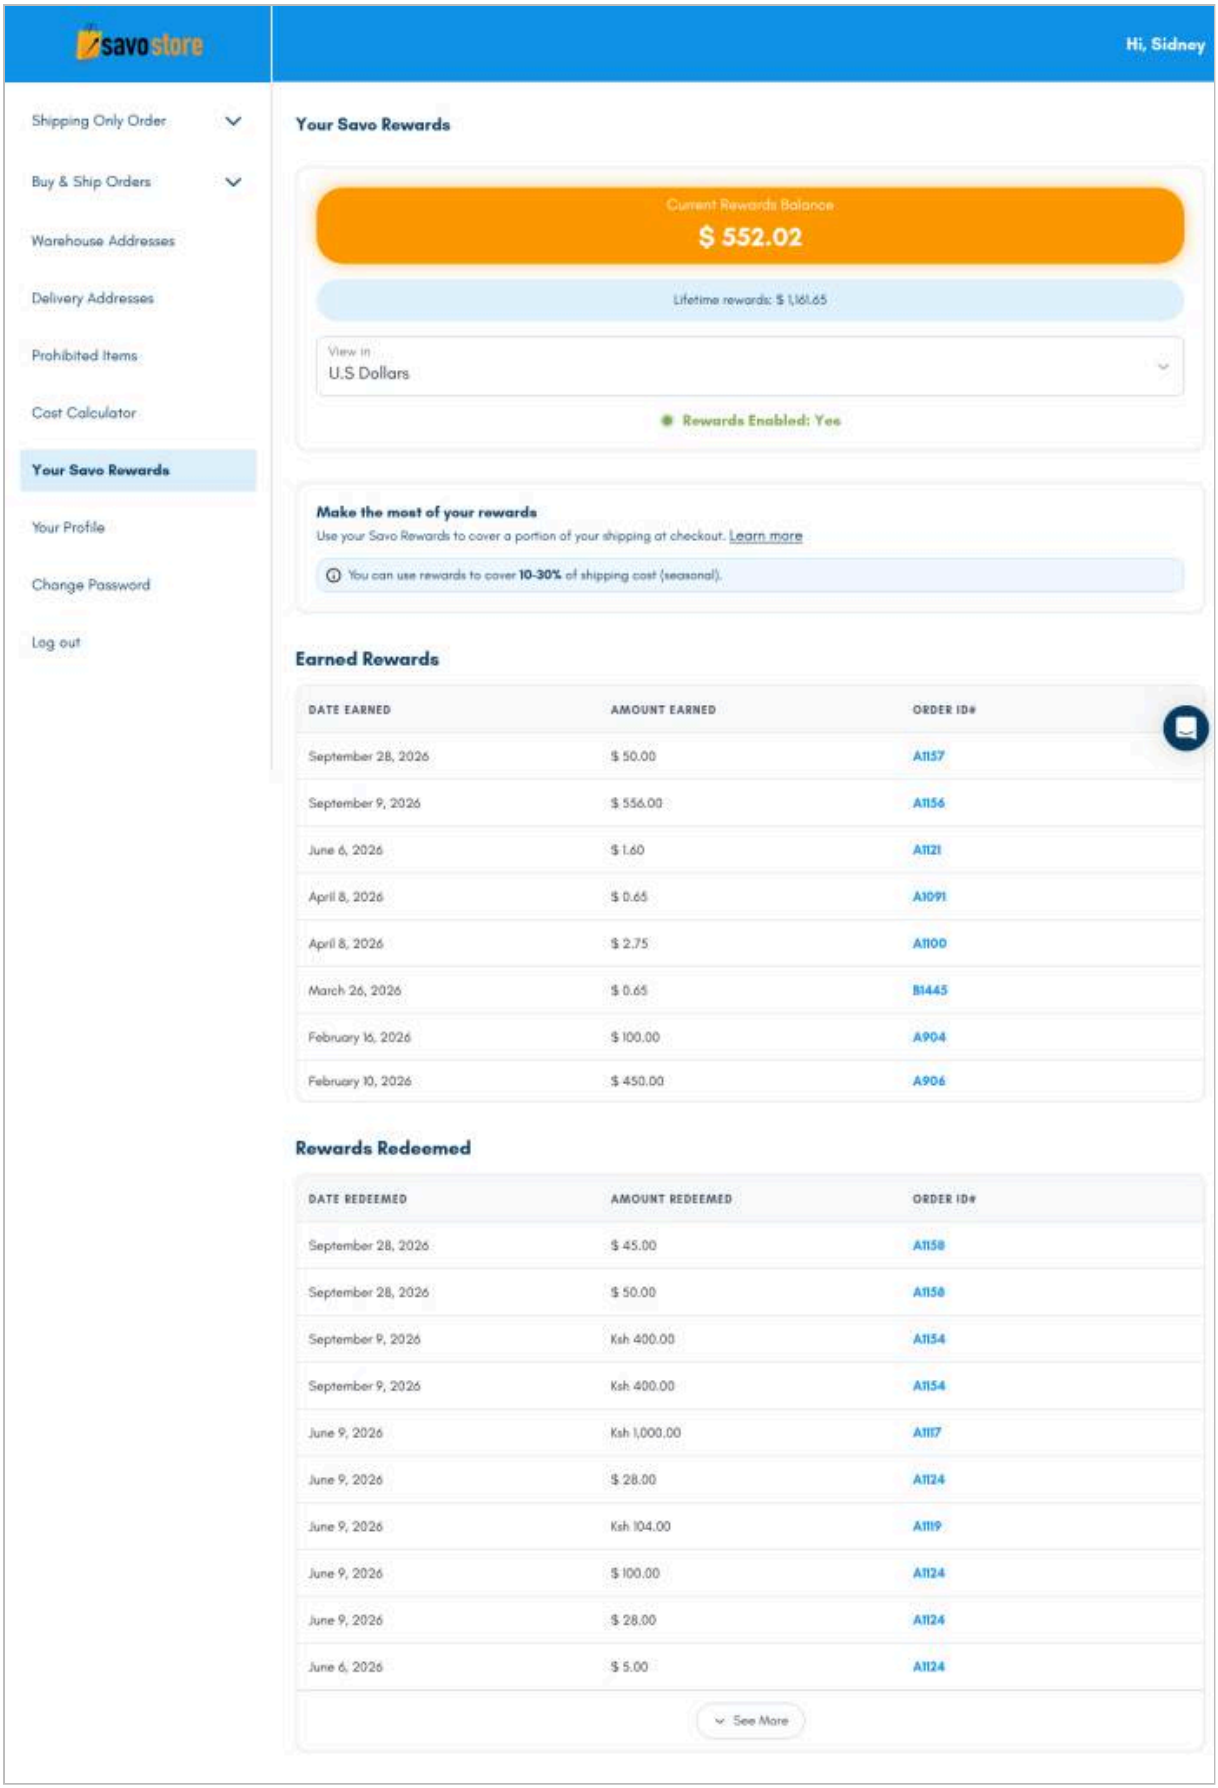

Fig. 58 - `a-15-portal-rewards-history.png`: Portal rewards history

B12 - Apply -> Remove -> Apply does not inflate PASS

Steps performed	apply / X / apply / X / apply 30 on A1158.
Expected	Single pending row, not stacked.
Actual	Single Applied row $30 in CRM.
Result	**PASS**

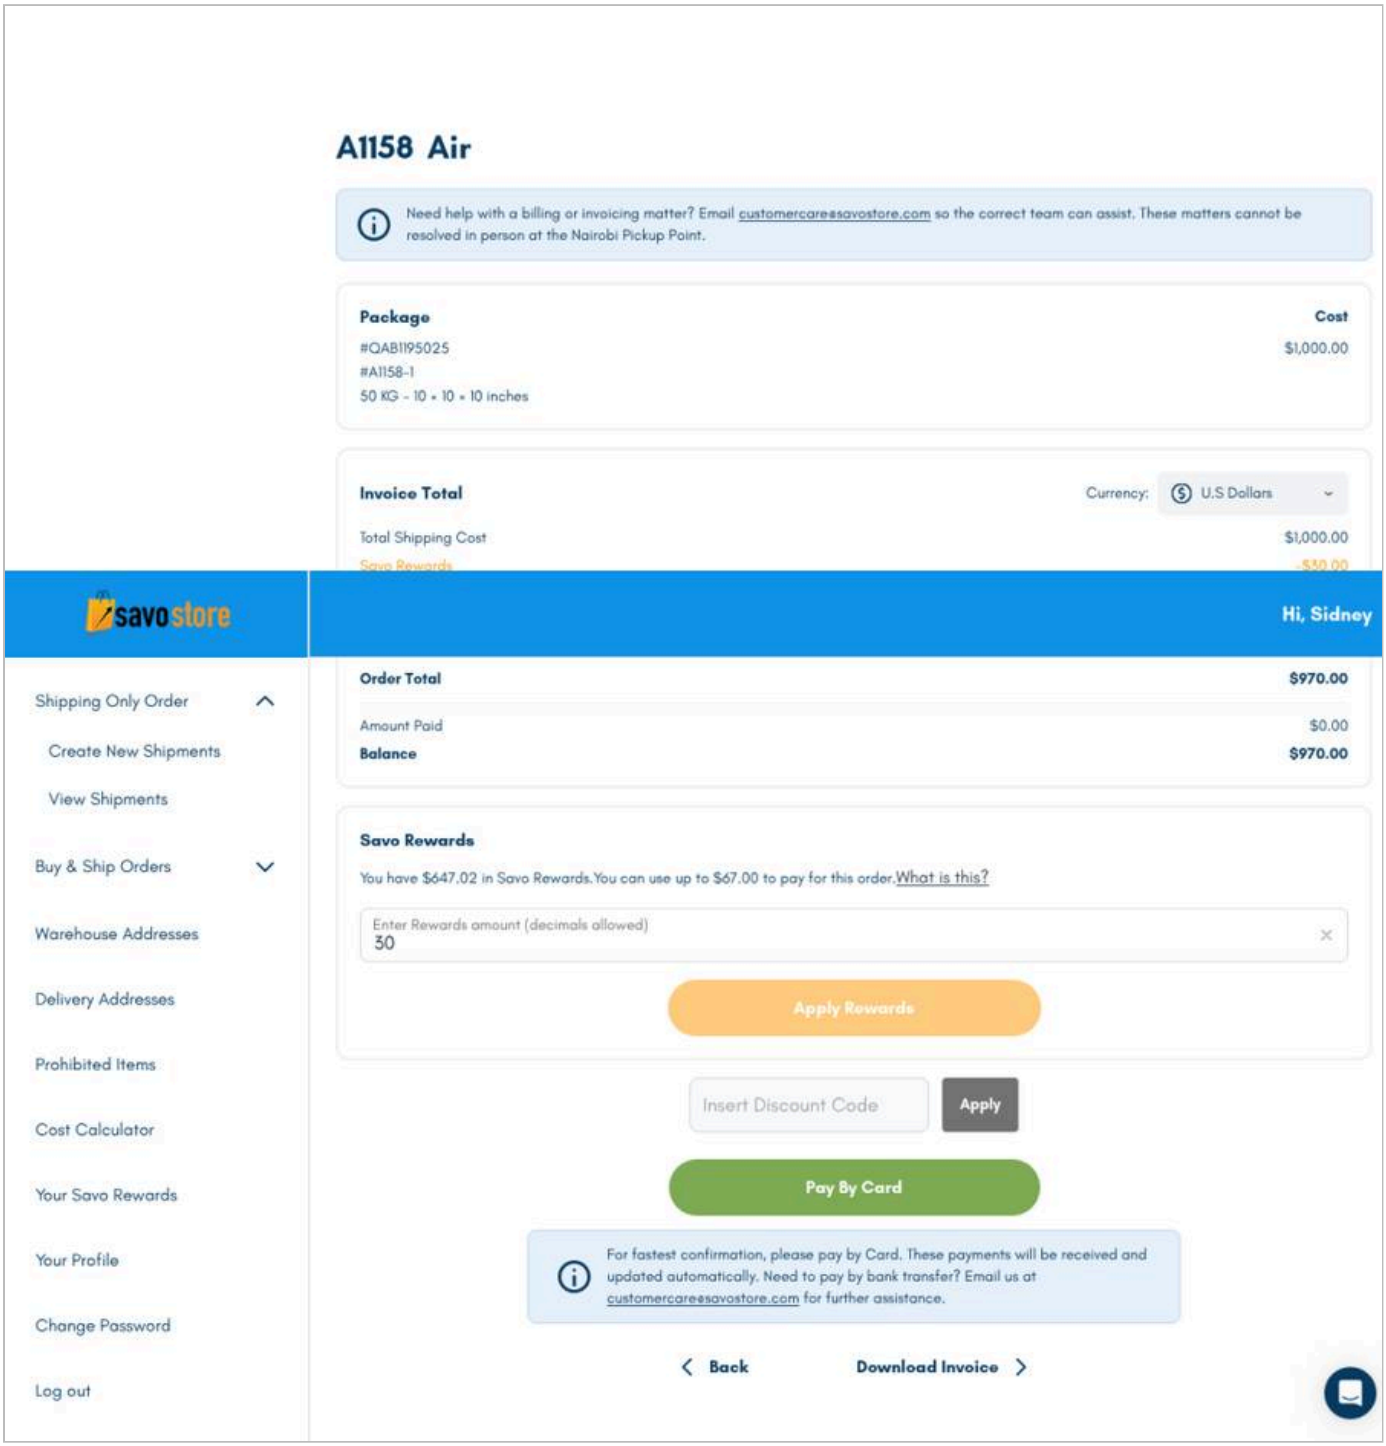

Fig. 59 - `b-04-b12-apply30-before-crm.png`: B12 apply30 before crm

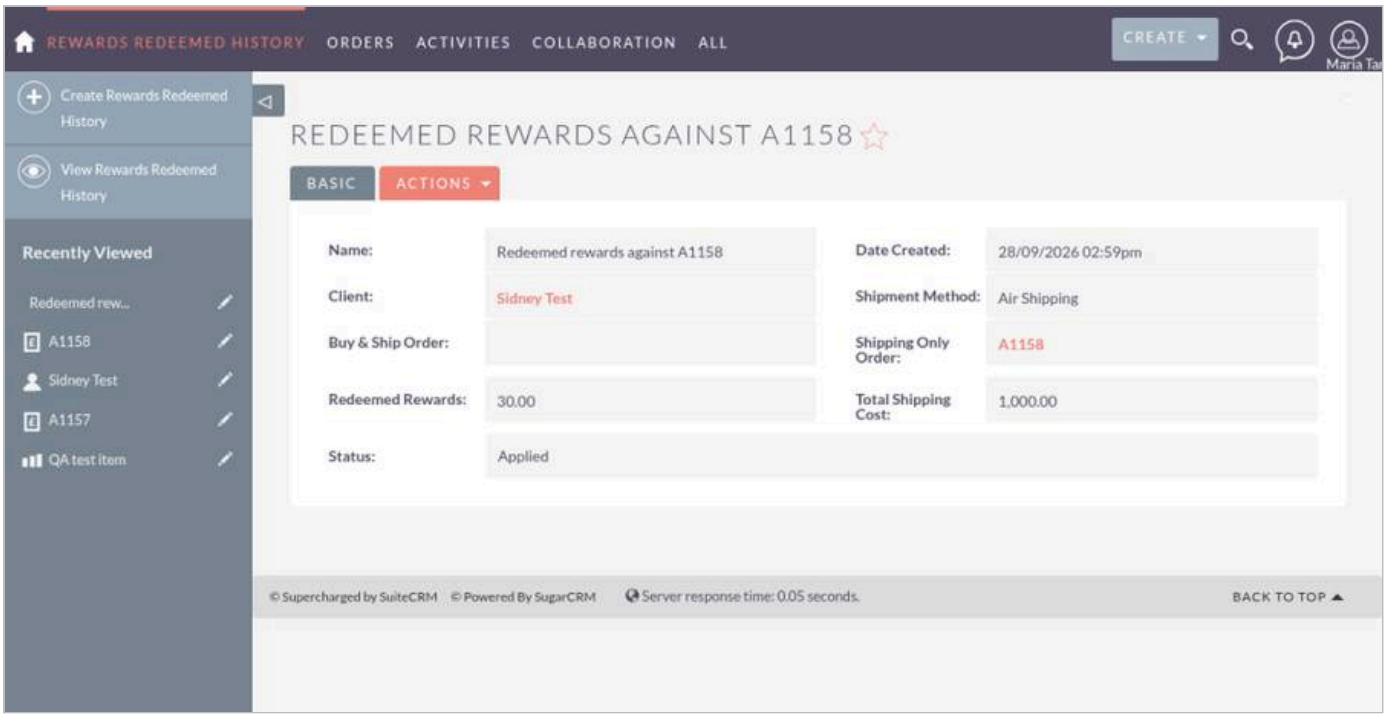

Fig. 60 - `b-05-b12-crm-one-pending-30-applied.png`: B12 crm one pending 30 applied

B13 - Recording timing FAIL

Steps performed	Watched CRM row status before Stripe, at Stripe open, after pay.
Expected	Before pay: at most Applied; after pay: Used.
Actual	Row flips Applied -> Used and wallet drops at Stripe open, before payment.
Result	FAIL

See also: Fig. 16 (a-06-crm-45-status-applied.png, in #165177 B5); Fig. 17 (a-09-crm-45-status-used-before-pay.png, in #165177 B5)

B14 - Wallet in order currency PASS

Steps performed	Checked wallet display on KES order A1159.
Expected	KES-converted wallet; Applicable consistent.
Actual	Wallet shown as KES 71,683 (512.02 x 140) consistently on portal and CRM.
Result	PASS

See also: Fig. 28 (c-05-crm-create-applicable-71683.png, in #165177 B8)

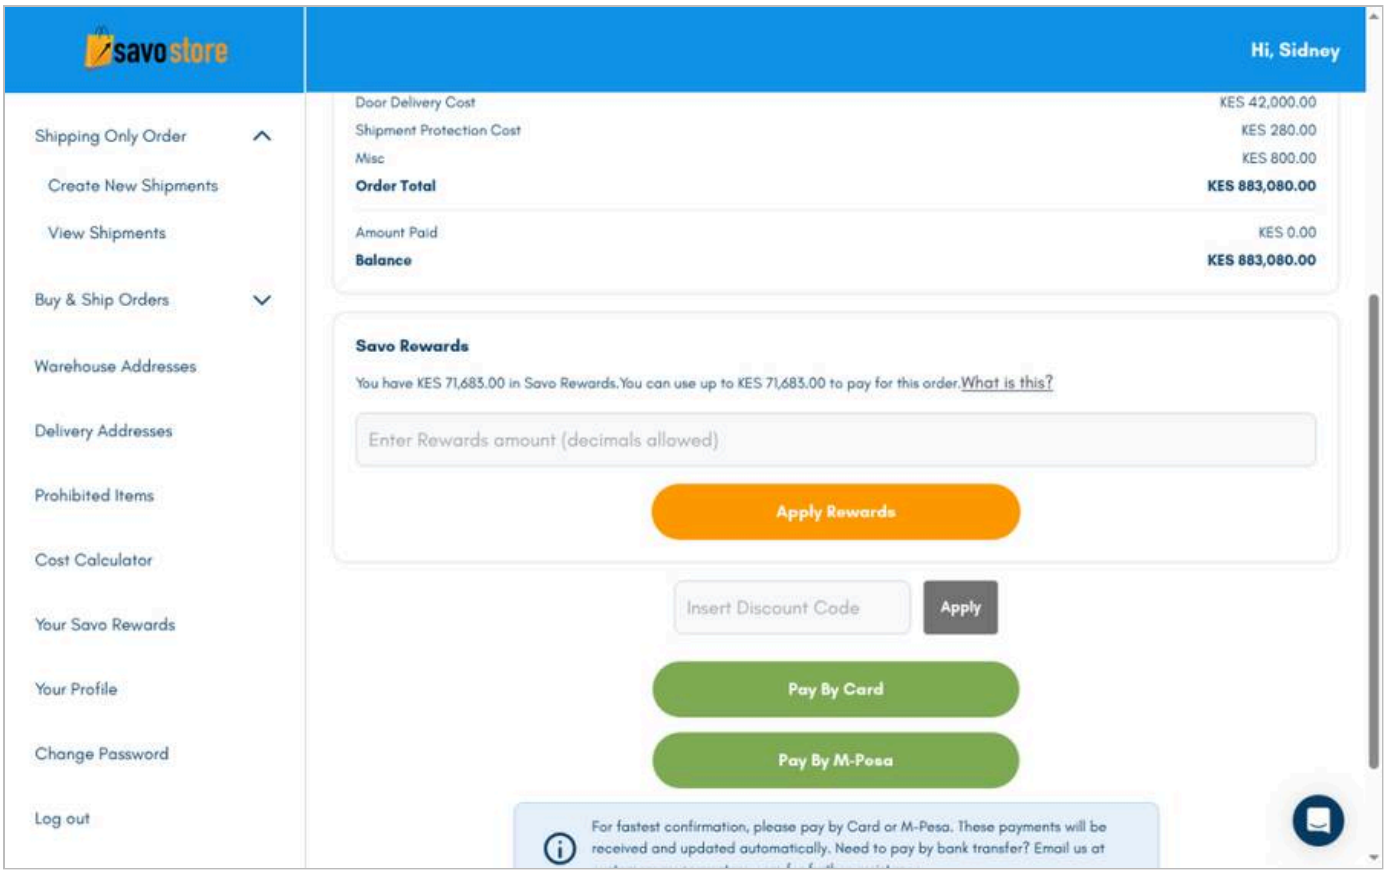

Fig. 61 - `c-04-portal-y-upto-71683.png`: Portal y upto 71683

B15 - Discount-parity smoke PARTIAL

Steps performed	Left page with portal rewards applied; checked admin reward; typed an invalid discount code.
Expected	Leaving clears session rewards; admin reward persists.
Actual	Leaving the page clears portal rewards; admin reward persists. Discount code field: invalid code gives no feedback and temporarily changes "up to" ($45 -> $95).
Result	PARTIAL

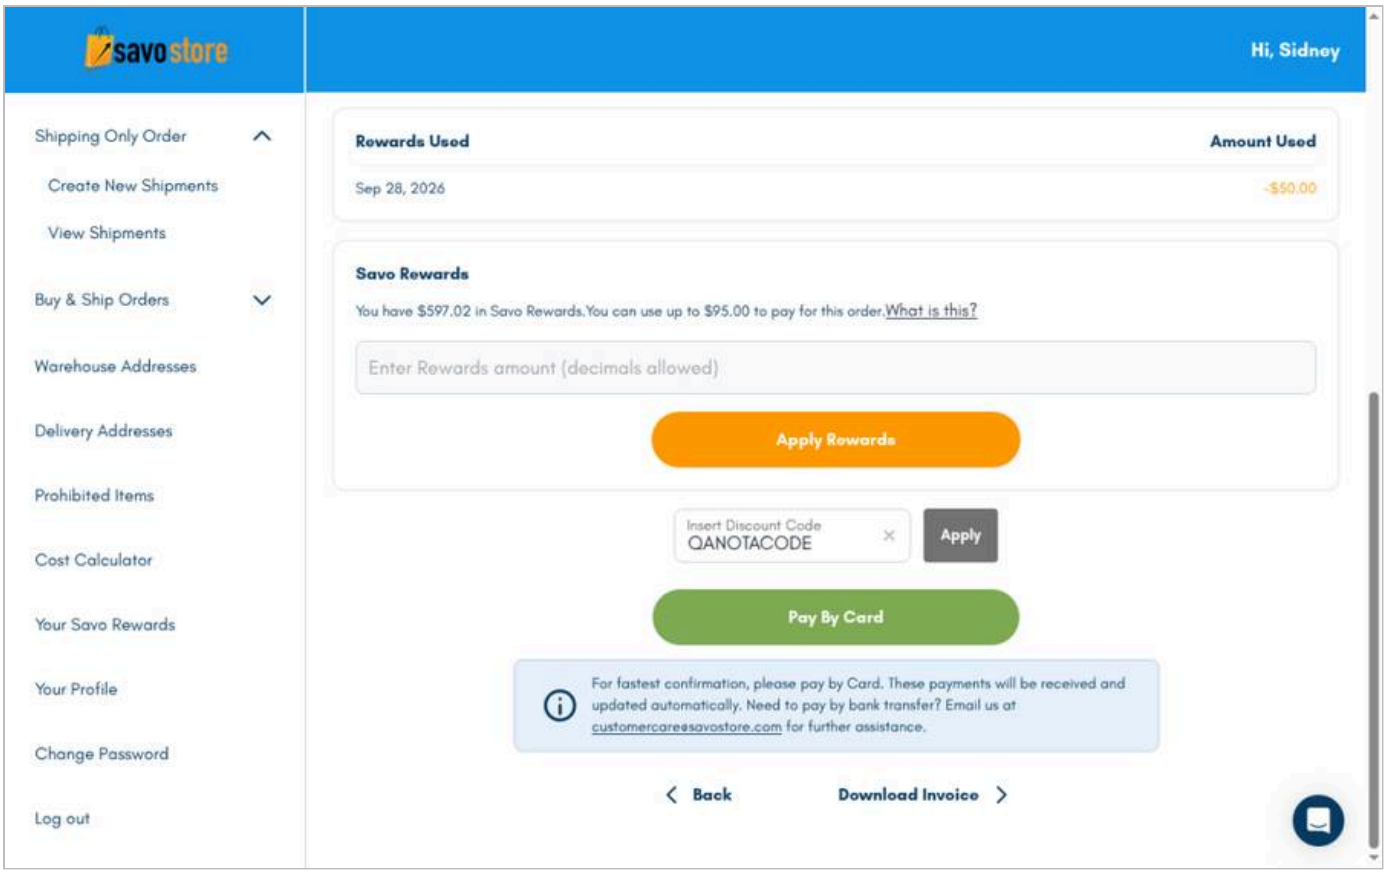

Fig. 62 - `b-19-b15-discount-code-typed.png`: B15 discount code typed

B16 - Soft Back keeps; hard reload / leave clears **FAIL (steps 1-2) / PASS (step 3)**

Steps performed	1) Soft Back from Stripe to same invoice. 2) Hard reload. 3) Orders list -> /rewards -> back to invoice.
Expected	1) pending kept (not committed); 2) reload clears; 3) navigation clears.
Actual	Step 1 FAIL: amount kept but already committed (Used). Step 2 FAIL: reload does not clear the committed amount (still $950). Step 3 PASS: navigating away and back clears pending and deletes the CRM row.
Result	**FAIL (steps 1-2) / PASS (step 3)**

See also: Fig. 21 (b-14-b7-back-keeps-50-950.png, in #165177 B6)

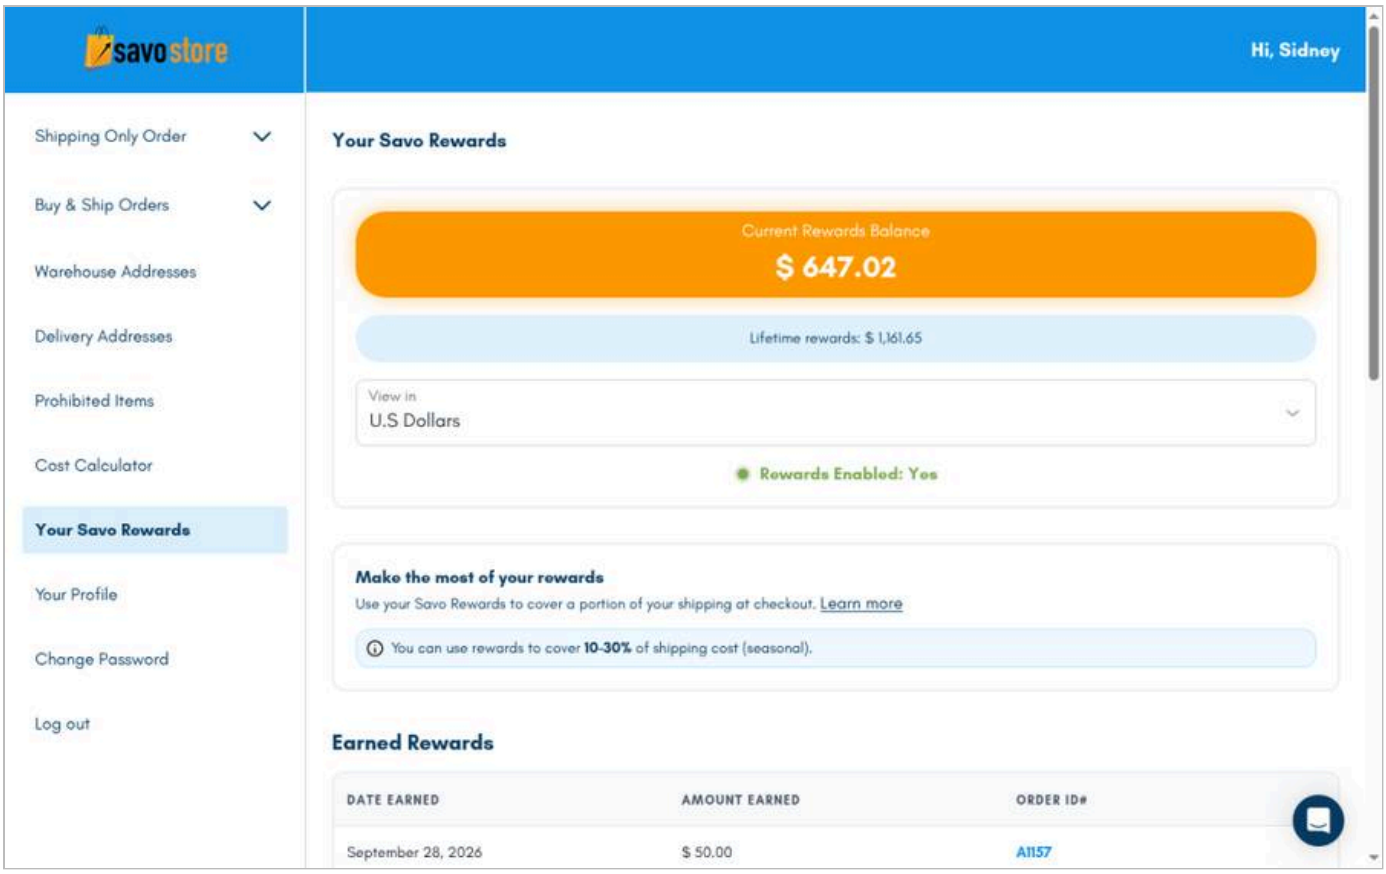

Fig. 63 - `b-10-b1b-rewards-page-647.png`: B1b rewards page 647

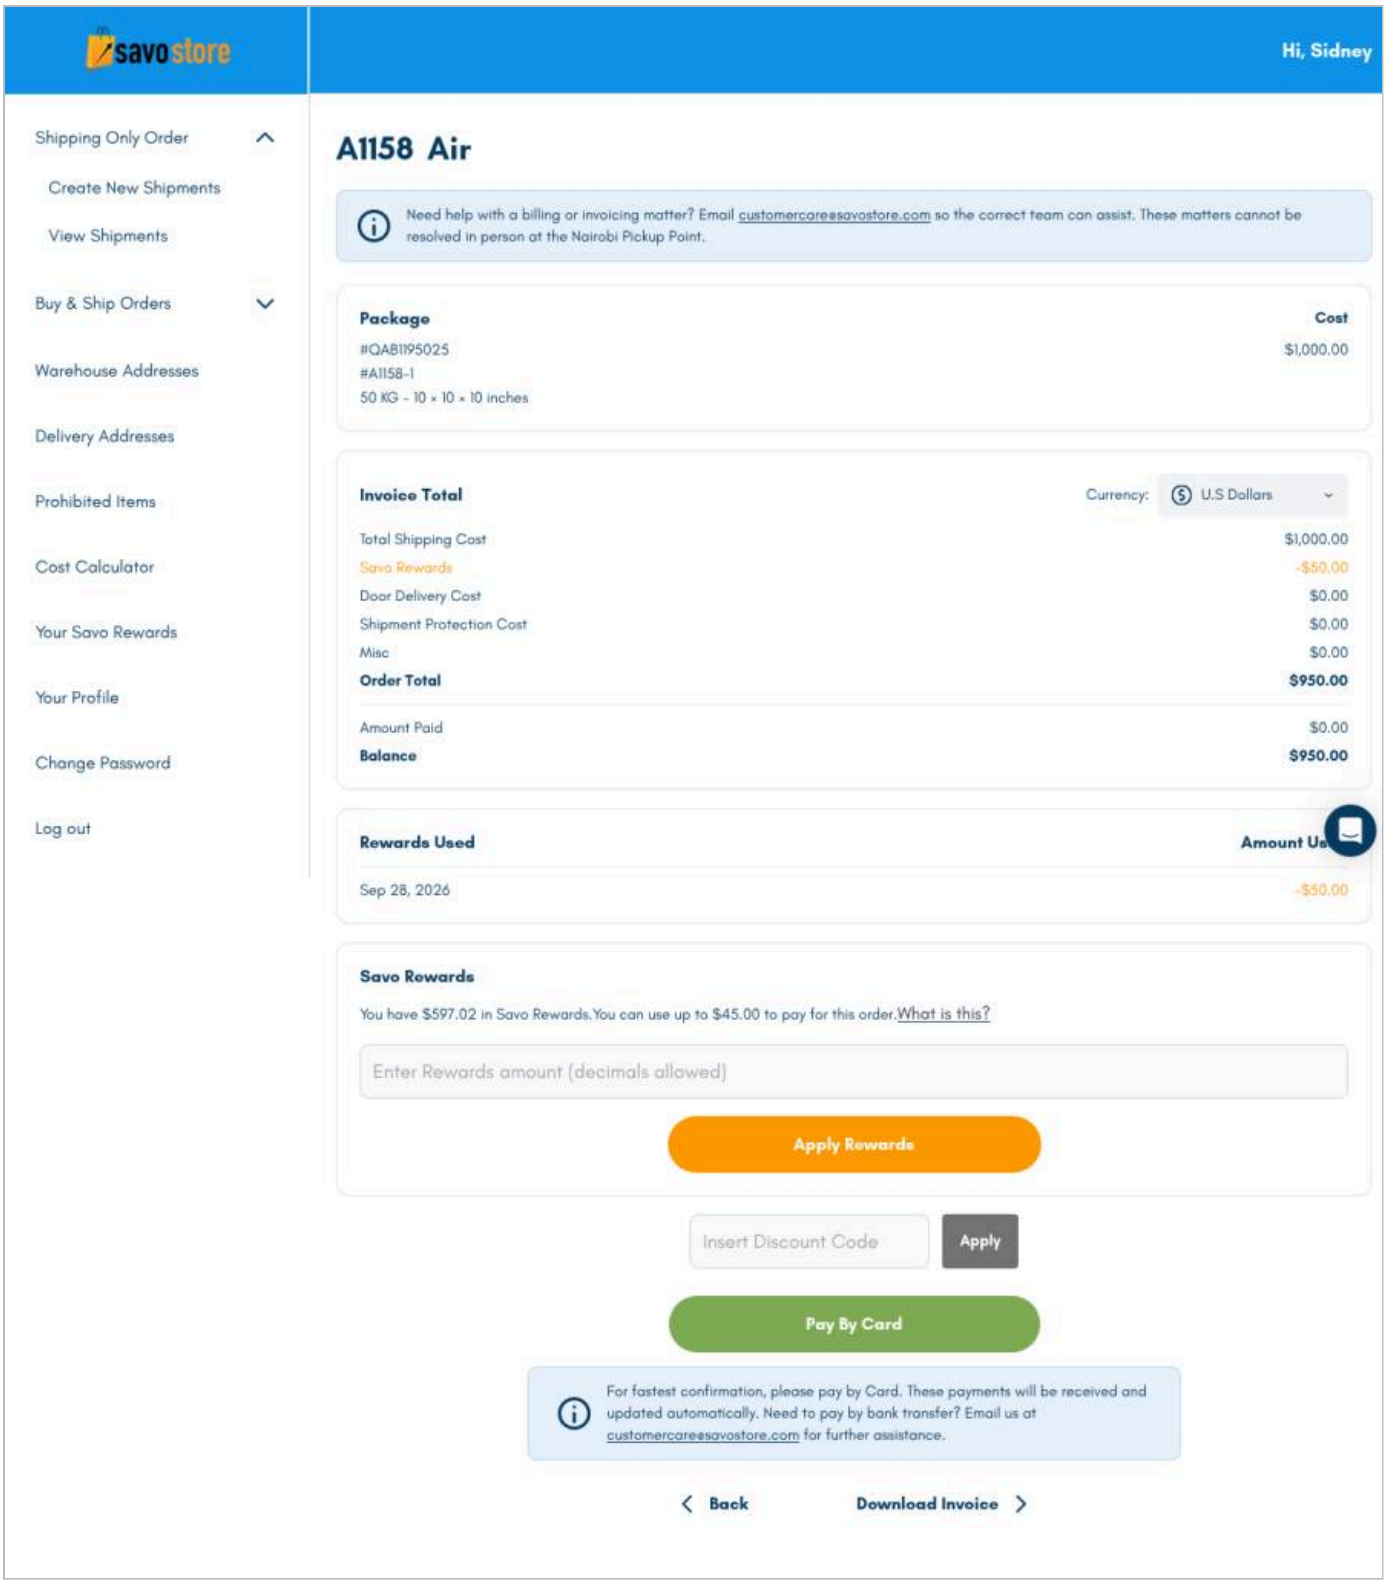

Fig. 65 - `b-18-b16-2-reload-still-950.png`: B16 2 reload still 950

B17 - Pay with session 0 after leftover pending NOT VERIFIED

Steps performed	-
Expected	No wallet burn; no bulk applied -> used.
Actual	An orphan pending row could not be created via the UI.
Result	NOT VERIFIED

No screenshot for this case.

B18 - M-Pesa finalize without AccountReference SKIPPED

Steps performed	-
Expected	-
Actual	M-Pesa out of scope per instruction.
Result	SKIPPED

No screenshot for this case.

B19 - Admin "by" survives portal replace-0; portal "against" cleared FAIL

Steps performed	On A1159 with admin "by" row (14,000), applied 5,768 on portal (twice), reloaded, navigated away.
Expected	Portal pending row created then cleared; admin row survives.
Actual	Portal apply 5,768 showed success but created no "against" row and no X; reload reverted. Admin "by" row survived leave/reload (that part PASS).
Result	FAIL

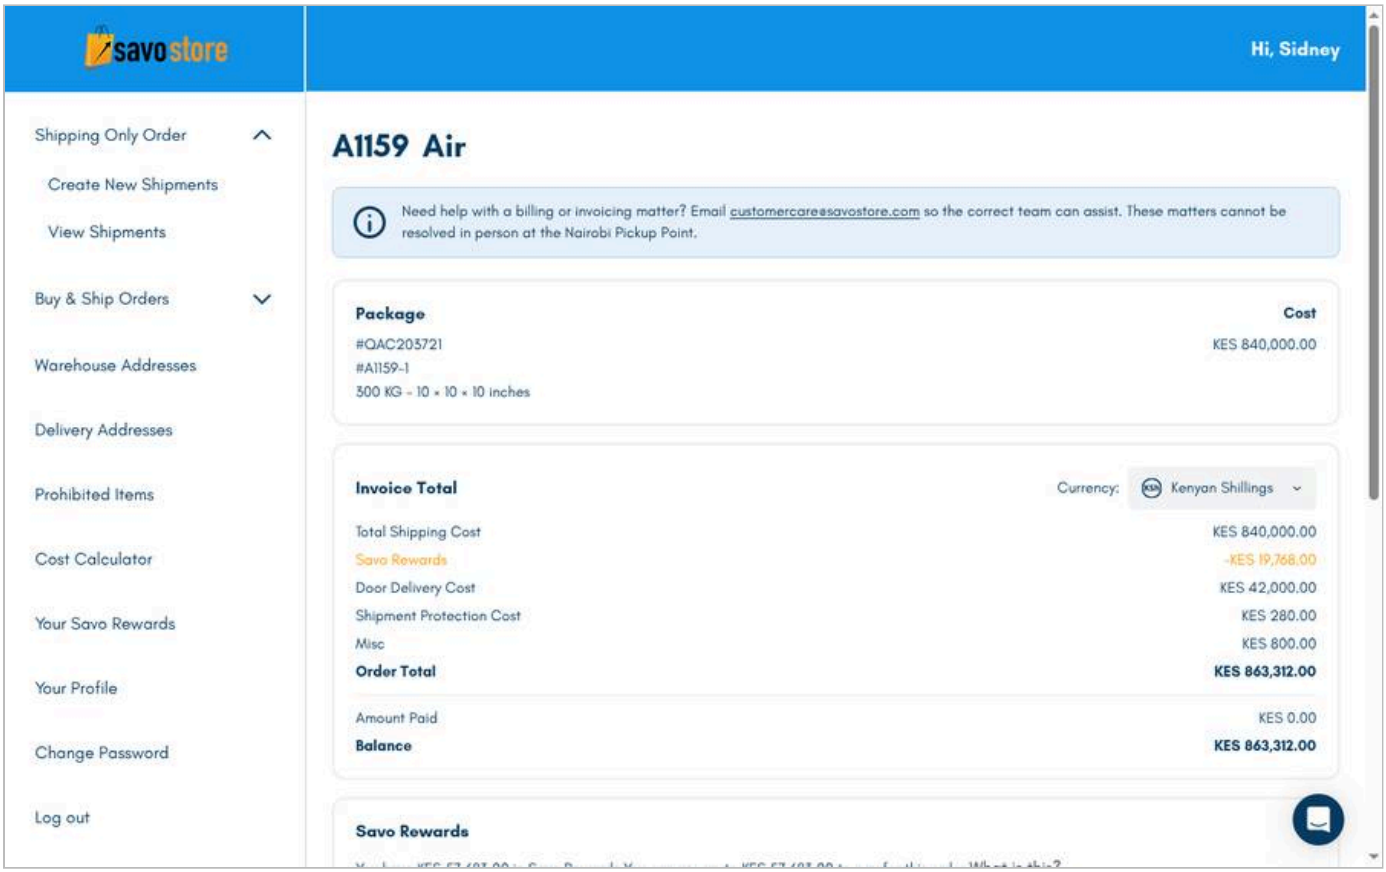

Fig. 66 - `c-14-portal-apply-5768.png`: Portal apply 5768

Task #165348 - Multiple Reward Redemptions When Shipping Cost Increases

Test cases: Redmine #165932. The spec uses KES 10,000 examples; A1/A2/A9 were run in USD on A1158 with equivalent logic, KES covered by A1159/B1461.

Case summary

ID	Title	Result
E0	Baseline wallet snapshot	PASS
E1	Complete an order to earn rewards	PASS (earn) - with note
E2	Seed wallet for multi-redeem	PASS
A1	Initial redeem (SO Ship Individually)	PASS (run in USD on A1158 instead of KES 10,000)
A2	Shipping increase unlocks additional rewards (anti-overpay)	PASS (USD analogue)
A3	Second payment redeems additional	PASS
A4	Block over-cap (seeded)	PASS
A5	Cap ignores non-shipping (incl. Misc)	PASS
A6	Insufficient wallet (seeded)	PASS
A7	CRM vs Portal parity	PASS
A8	Buy & Ship parity	PARTIAL / BLOCKED
A9	Partial first redeem then shipping increase	PASS
A10	Balance never negative	PASS
A11	No double wallet deduction	PASS
A12	Full Ship Individually story	PASS (flow) / FAIL (final W = L - U)
A13	Wallet never negative; no duplicate used on retry	NOT VERIFIED
A14	Copy drops after partial apply on shipping increment; X restores	FAIL

Cross-cutting checklist

ID	Check	Result
C1	CRM Applicable == Portal after ship bump	PASS

C2	KES + USD consistency	**PASS - KES wallet shown as USD x 140 consistently on portal and CRM**
C3	SO + BAS	**PARTIAL - SO full; B&S cap only**
C4	Non-shipping never increases Applicable	**PASS**
C5	Never negative balance / customer credit	**PASS**
C7	Earn then redeem: W_final = L - U	**FAIL - gap 20.50 grew to 120.50**
C8	Rewards Used only after successful redemption	**FAIL - Rewards Used / used row appears after abandoned checkout**
C9	Soft Back keeps pending; hard refresh / other routes clear	**FAIL**
C10	Remaining "up to" drops by pending; X restores	**FAIL**
C11	No leftover bulk applied -> used; no duplicate used on retry	**NOT VERIFIED**

Case details

E0 - Baseline wallet snapshot PASS

Steps performed	Opened contact Sidney Test in CRM and recorded Current / Total (lifetime) / Used; opened portal Savo Rewards page and dashboard.
Expected	Portal rewards match CRM (currency-aware); W0, L0, U0 recorded.
Actual	Current $597.02, Total (lifetime) $1,111.65, Used $494.13. Portal $597.02 = CRM Current. Note: Total - Used = 617.52, i.e. Current is 20.50 lower than the formula already at baseline.
Result	**PASS**

Fig. 77 - `e0-04-portal-dashboard-rewards.png`: Portal dashboard rewards

E1 - Complete an order to earn rewards **PASS (earn) - with note**

Steps performed	Created new Shipping Only order A1157 on portal: 50 chargeable kg x $20 = $1,000 shipping. Paid $1,000 via Stripe sandbox (card 4242) without rewards. Moved order to Order Delivered in CRM. Checked Loyalty/Rewards on contact and portal.
Expected	New earned row; L1 > L0; W1 = L1 - U0; portal matches CRM.
Actual	Loyalty row $50 (5% of $1,000). Current 597.02 -> 647.02 (+50), Total 1,111.65 -> 1,161.65 (+50); portal matched. However W1 = L1 - U0 is false: 647.02 vs 667.52 because of the pre-existing 20.50 gap (see bug 4).
Result	**PASS (earn) - with note**

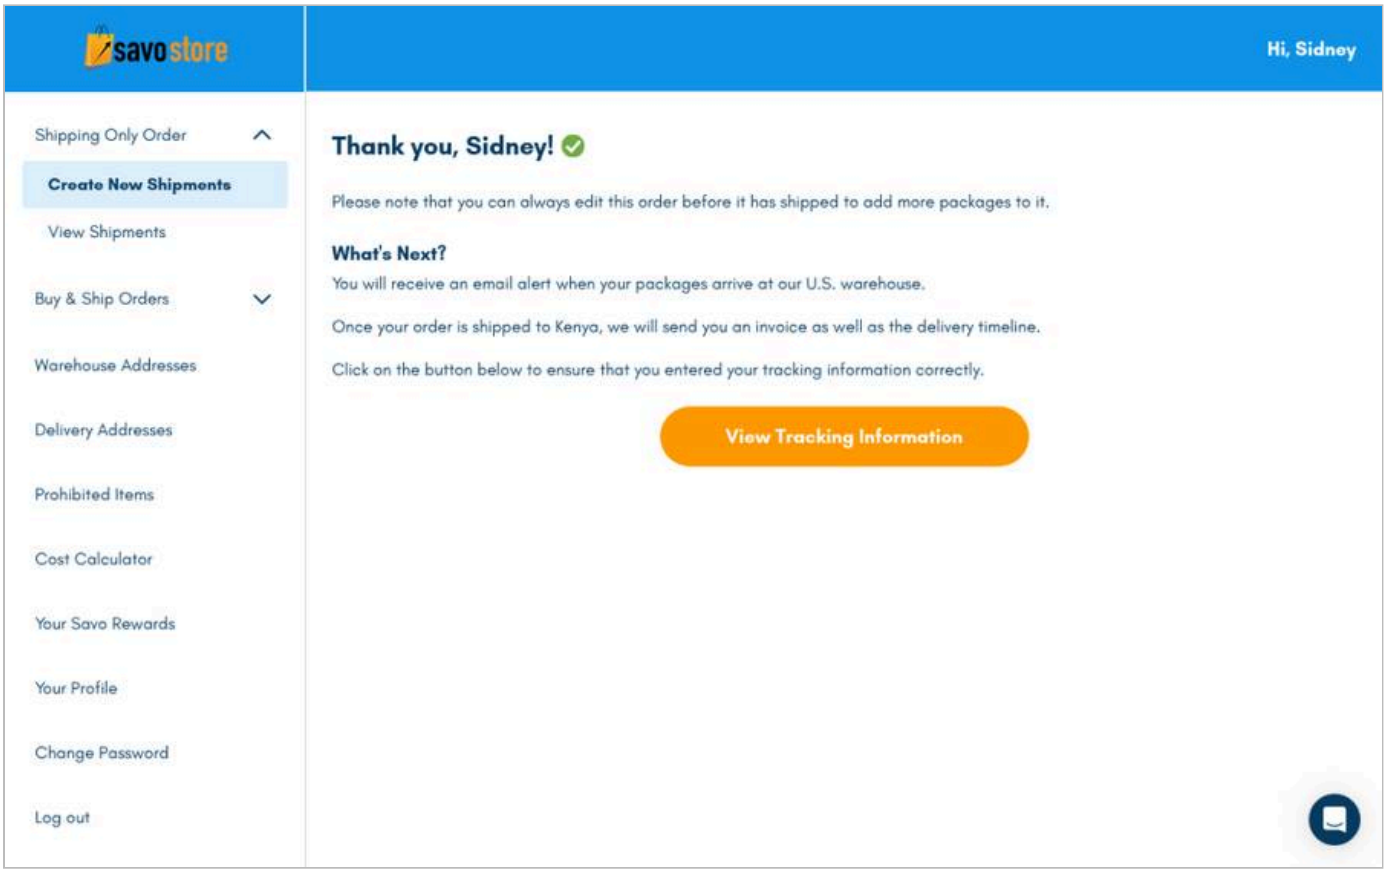

Fig. 78 - `e1-01-portal-order-submitted.png`: Portal order submitted

E2 - Seed wallet for multi-redeem PASS

Steps performed	Checked wallet after E1.
Expected	Current Rewards >= $100.
Actual	Current $647.02 (>= $100).
Result	**PASS**

See also: Fig. 85 (e1-08-crm-rewards-after-earn.png, in #165348 E1)

A1 - Initial redeem (SO Ship Individually)

PASS (run in USD on A1158 instead of KES 10,000)

Steps performed	On A1158 ($1,000 shipping, 1 package; an earlier $50 had already been committed - see #165177 B6): checked portal cap and CRM Rewards Redeemed Create Applicable; applied 45 on portal; opened Stripe ($905) and paid in sandbox; checked CRM order totals, contact, Rewards Redeemed row and portal history.
Expected	Portal Applicable = 10% of shipping; CRM Applicable = portal; wallet reduced by redeemed; balance >= 0; one used row in order currency; portal Rewards Used row only after success.
Actual	Portal cap = 10% of shipping; CRM Create Applicable 45.00 = portal "up to $45" (after the earlier $50). Applied 45, Stripe $905, paid. CRM: Savo Rewards -95, Paid 905, Balance 0; Used rows in order currency; portal history rows present. Contact after pay: Current 552.02, Used 589.13. Note: the Rewards Used row / Used status appears when checkout opens, not only after success (bug 1).
Result	**PASS (run in USD on A1158 instead of KES 10,000)**

A2 - Shipping increase unlocks additional rewards (anti-overpay)

PASS (USD analogue)

Steps performed	Added 2nd package $400 to A1158 in CRM (shipping 1,000 -> 1,400; already paid-through 1,000). Checked portal "up to".
Expected	Applicable = 10% of new unpaid shipping only; no customer credit.
Actual	Portal Applicable $40 = 10% of unpaid $400 - not 45 (140 - 95) and not 140.
Result	**PASS (USD analogue)**

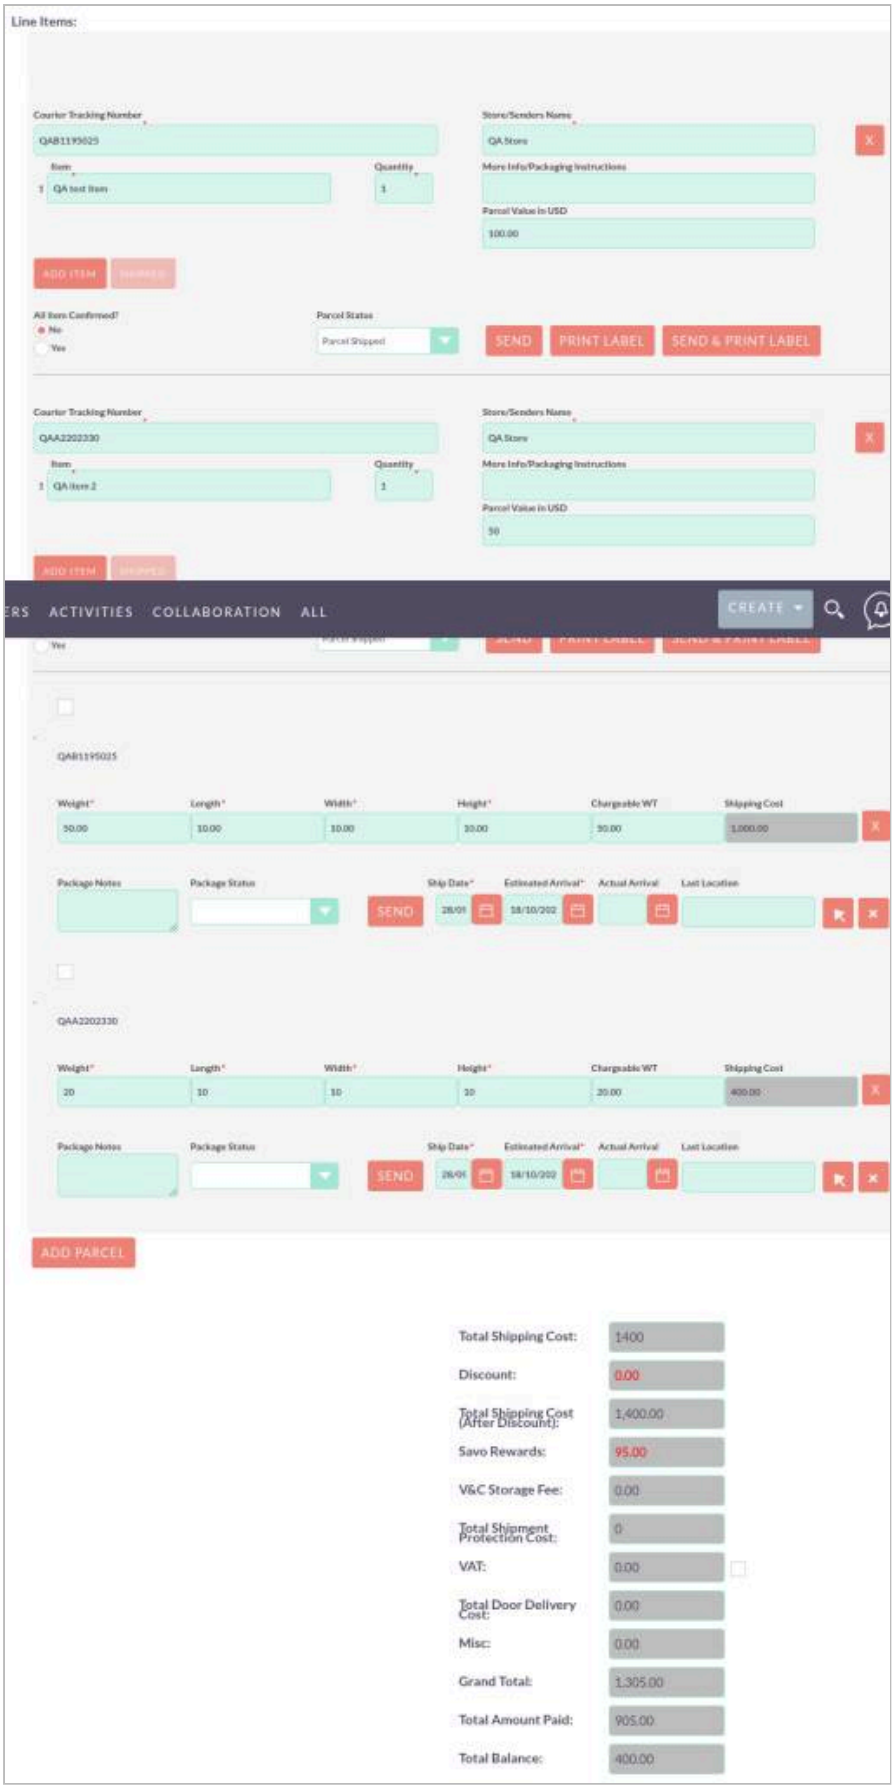

Fig. 94 - `a-16-crm-edit-second-parcel-before-save.png`: Crm edit second parcel before save

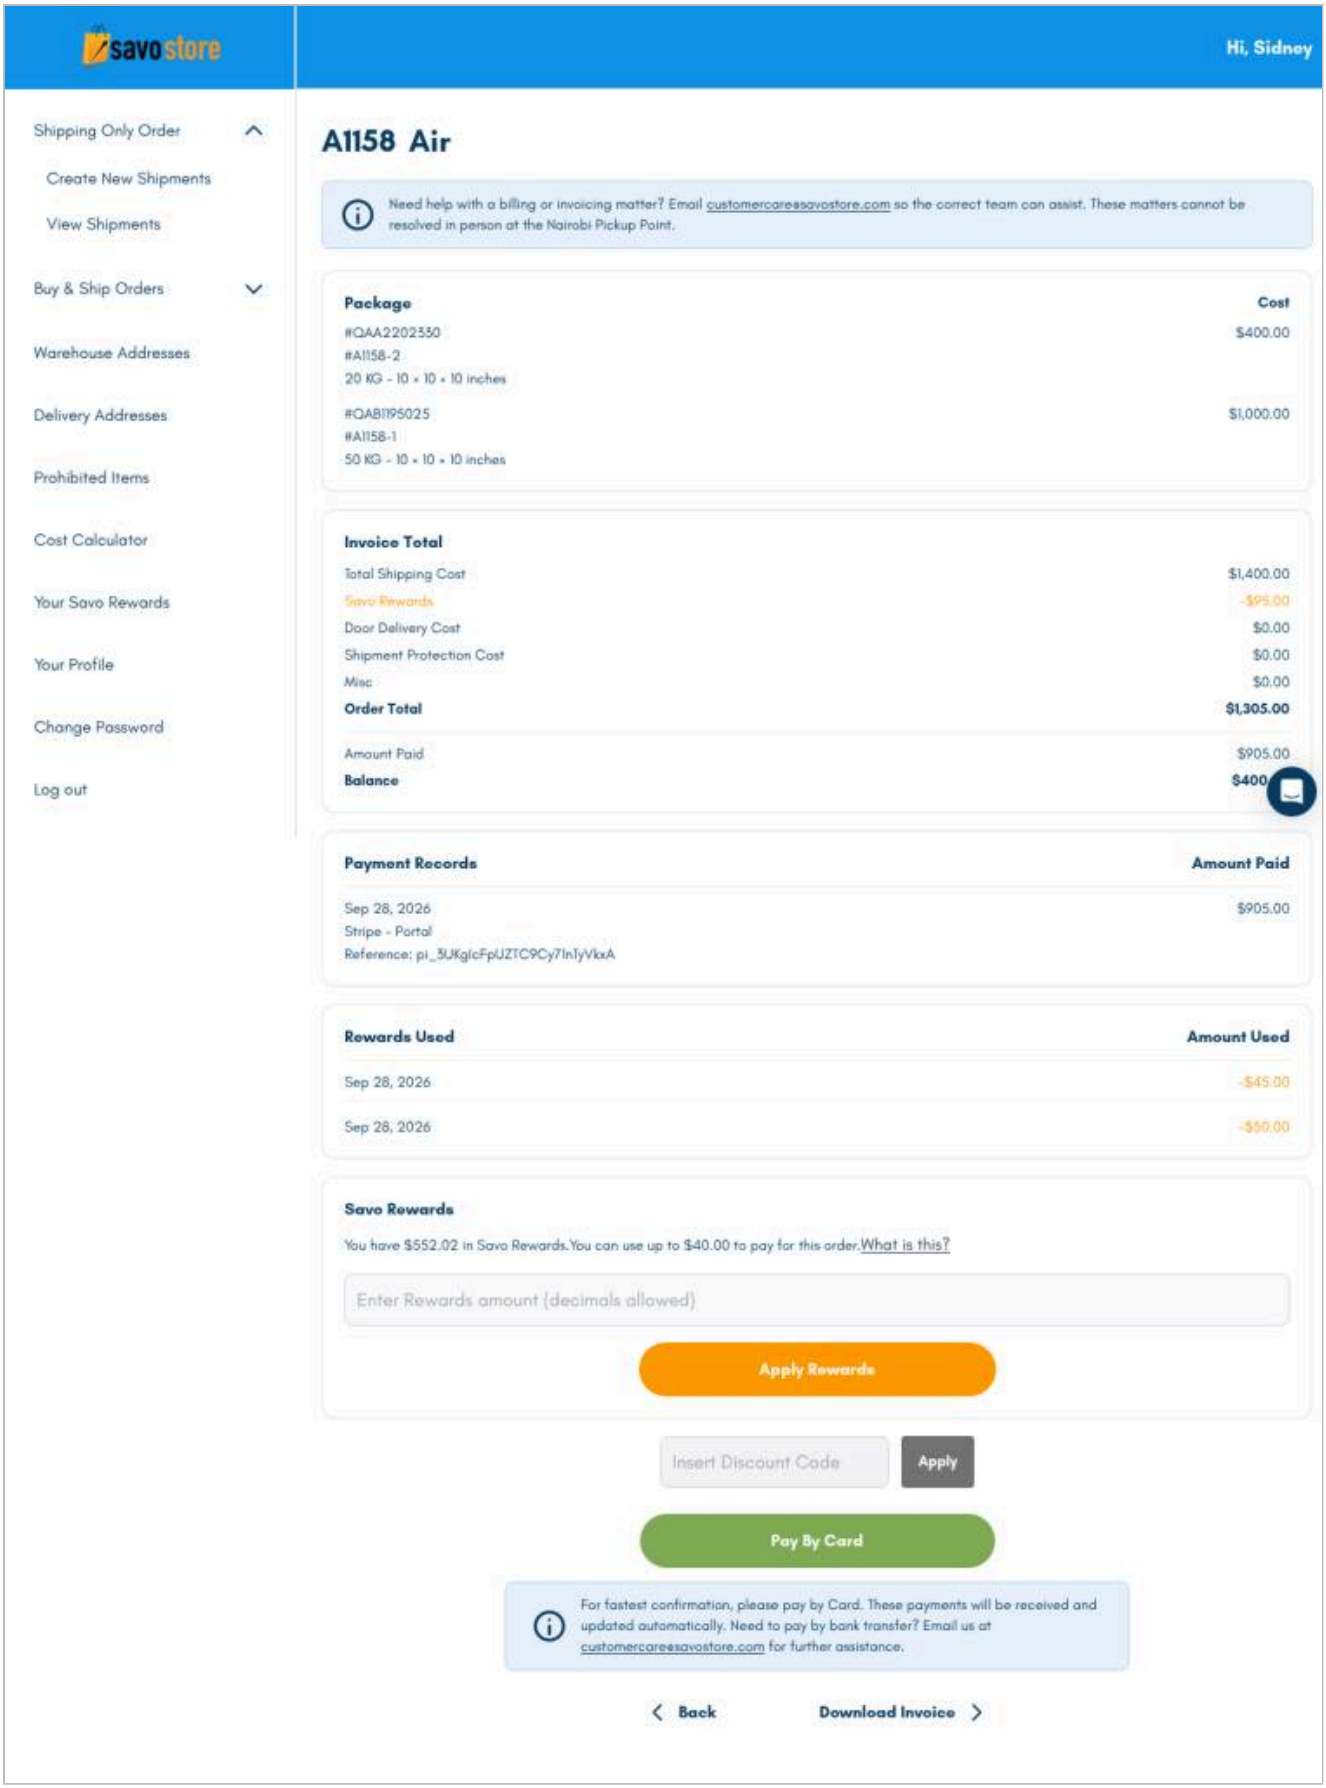

Fig. 96 - `a-18-portal-up-to-40.png`: Portal up to 40

A3 - Second payment redeems additional PASS

Steps performed	Applied 40 on A1158, paid Stripe sandbox $360.
Expected	Additional used activity in CRM; Rewards Used lists multiple redemptions.
Actual	Paid. Three separate Used rows $50 / $45 / $40 in CRM and in portal history. CRM final: balance 0; contact Current 512.02, Used 629.13.
Result	**PASS**

See also: Fig. 12 (a-25-stripe-sandbox-360.png, in #165177 B4)

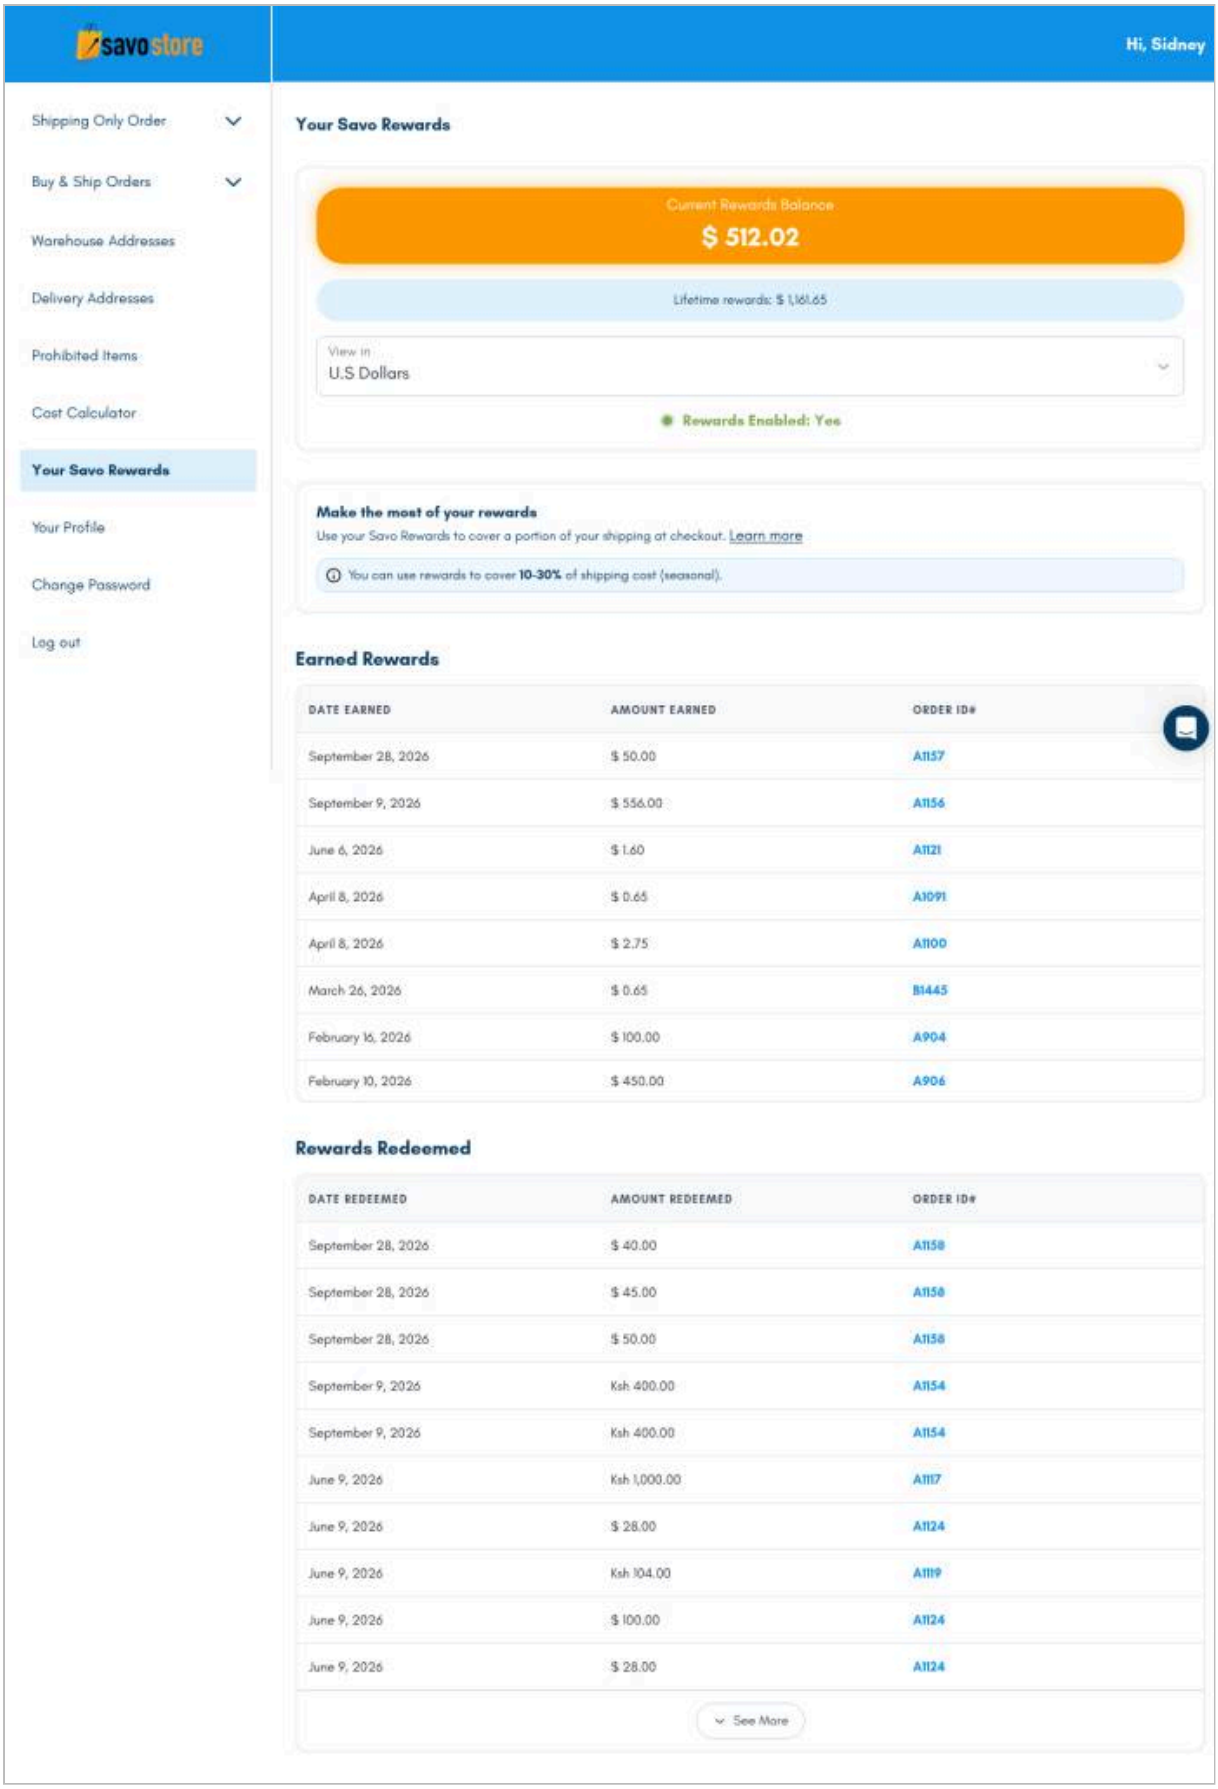

Fig. 104 - `a-31-portal-rewards-final-512.png`: Portal rewards final 512

A4 - Block over-cap (seeded) PASS

Steps performed	With remaining cap 40, applied 41.
Expected	Rejected with limit message; no pending; wallet unchanged; copy still C.
Actual	"Rewards amount cannot exceed $40.00."; no pending row; wallet unchanged; copy still 40.
Result	**PASS**

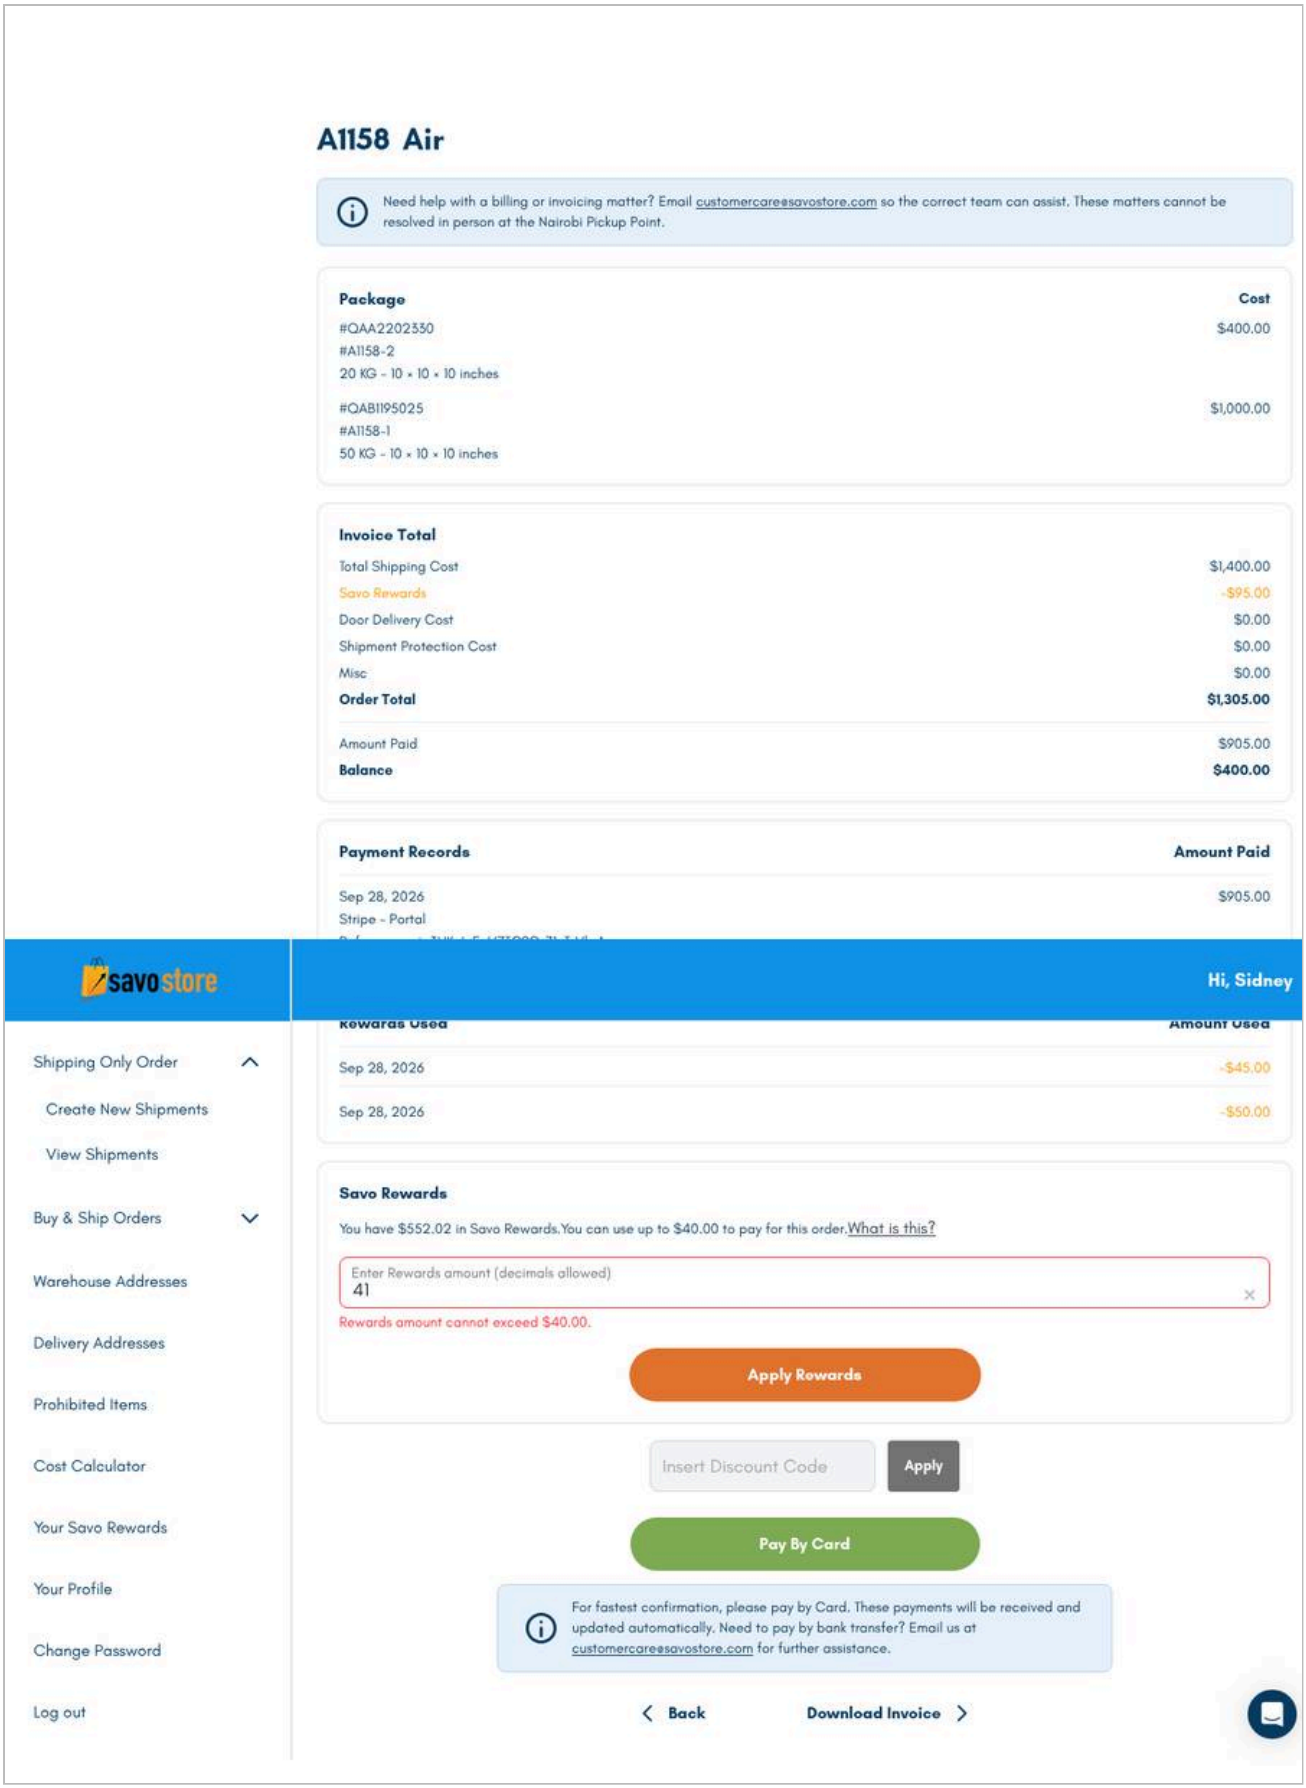

Fig. 105 - `a-22-portal-apply-41-limit.png`: Portal apply 41 limit

A5 - Cap ignores non-shipping (incl. Misc) PASS

Steps performed	On A1159 (KES): shipping 840,000 + protection 280 + next-day door delivery 42,000 + misc 800. Checked portal and CRM Applicable.
Expected	Applicable = 10% of shipping only; CRM = portal.
Actual	Cap based on shipping only (10% = 84,000), limited by wallet to KES 71,683 on both portal and CRM.
Result	**PASS**

See also: Fig. 61 (c-04-portal-y-upto-71683.png, in #165177 B14); Fig. 28 (c-05-crm-create-applicable-71683.png, in #165177 B8)

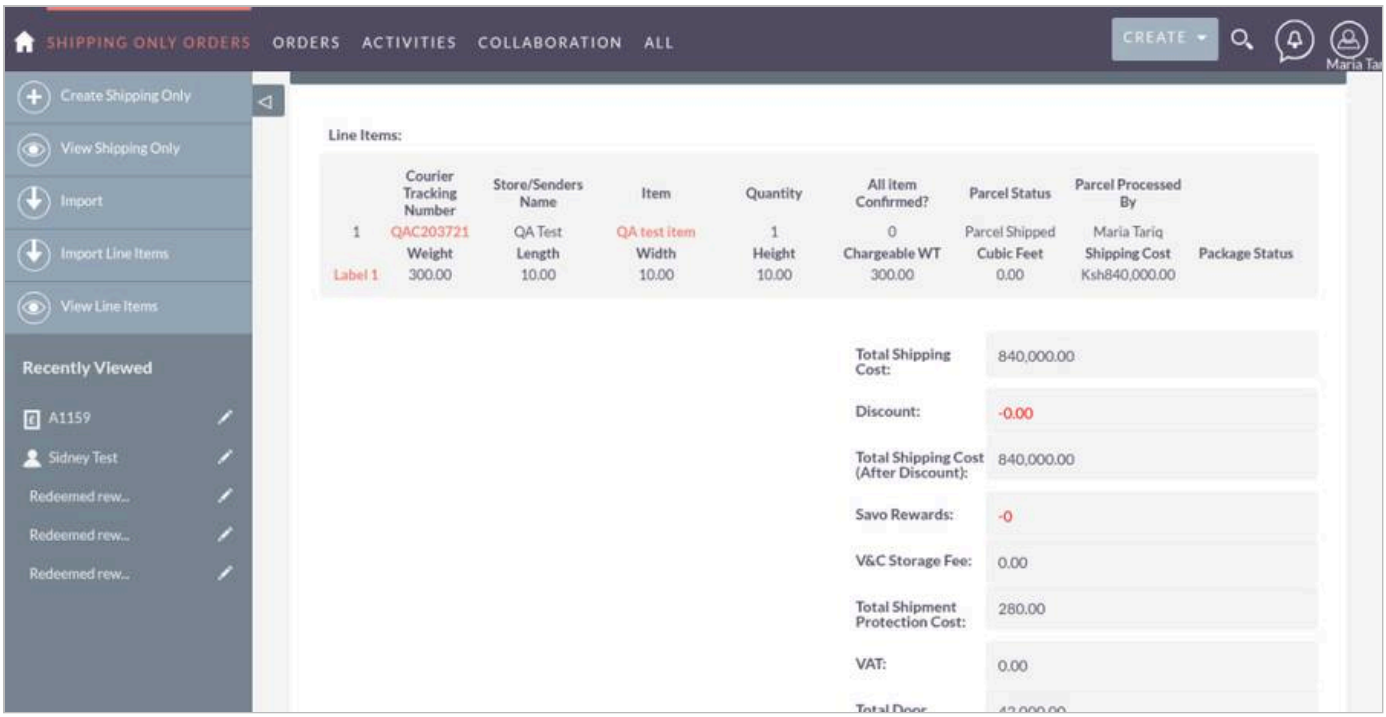

Fig. 107 - `c-02-crm-y-shipping-line.png`: Crm y shipping line

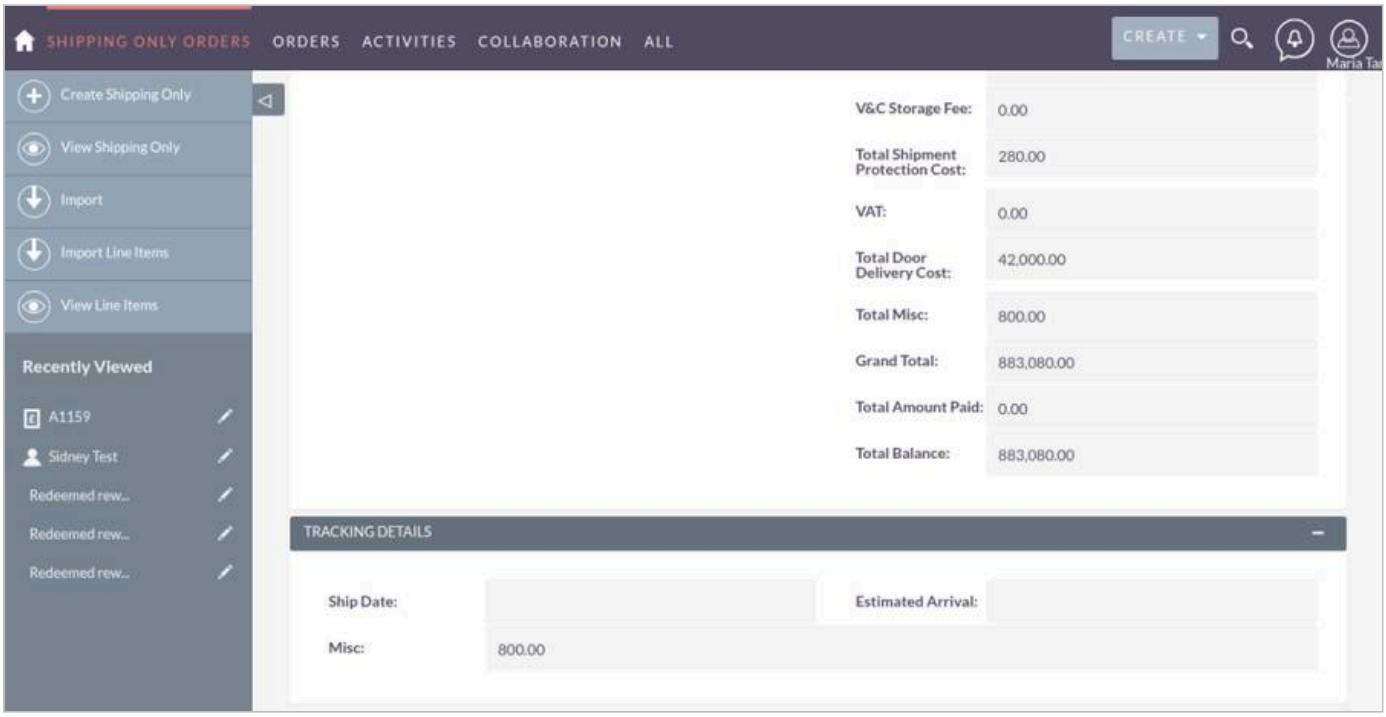

Fig. 108 - `c-03-crm-y-grand.png`: Crm y grand

A6 - Insufficient wallet (seeded) PASS

Steps performed	On A1159 applied 84,000 (the shipping cap) and 71,684 (wallet + 1).
Expected	Rejected; wallet unchanged; no pending.
Actual	Both blocked with "Rewards amount cannot exceed KES 71,683.00."; no pending; wallet unchanged. Minor: wording does not mention insufficient wallet.
Result	PASS

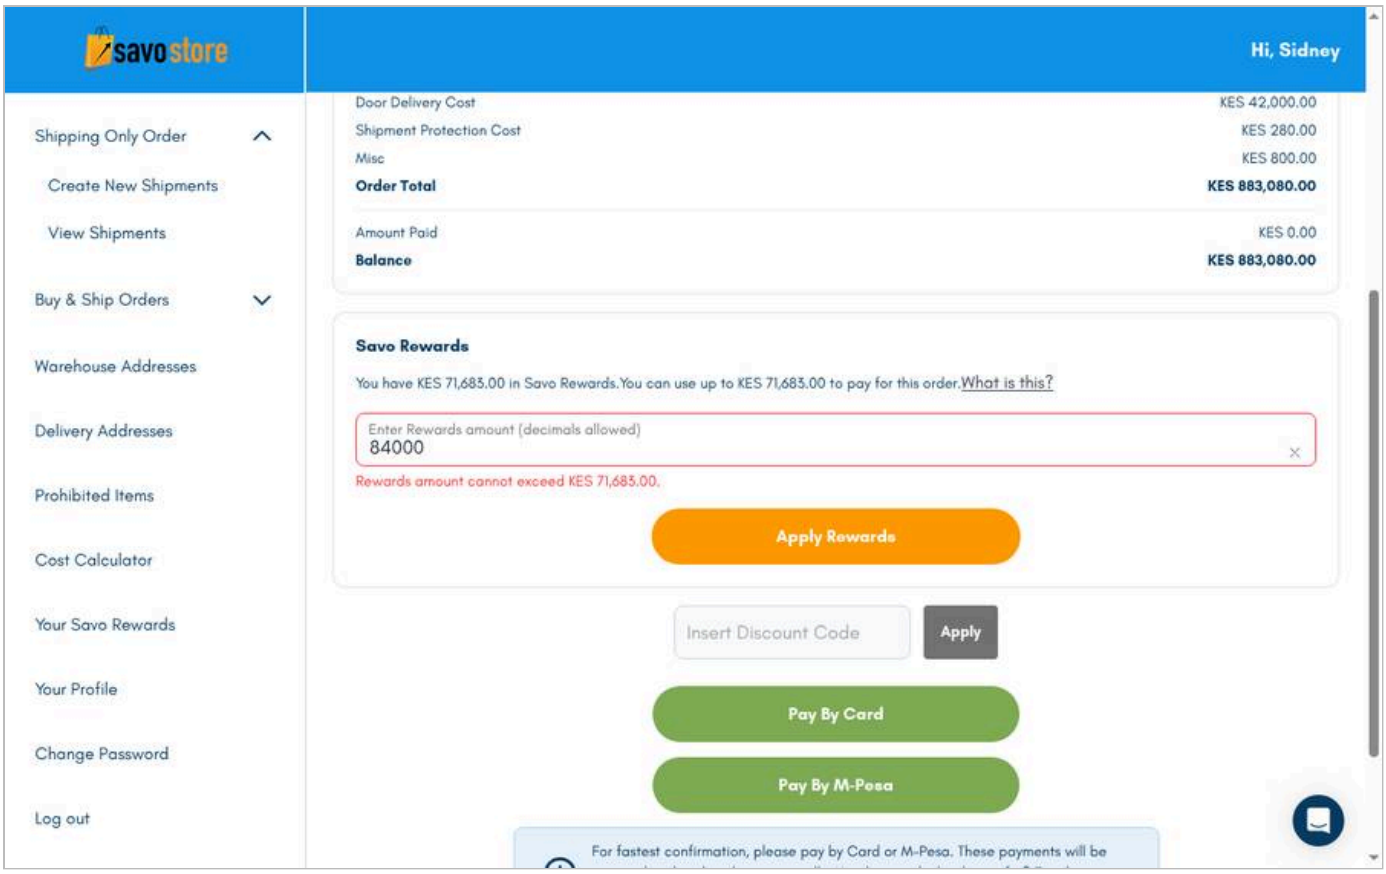

Fig. 109 - `c-06-portal-apply-84000-blocked.png`: Portal apply 84000 blocked

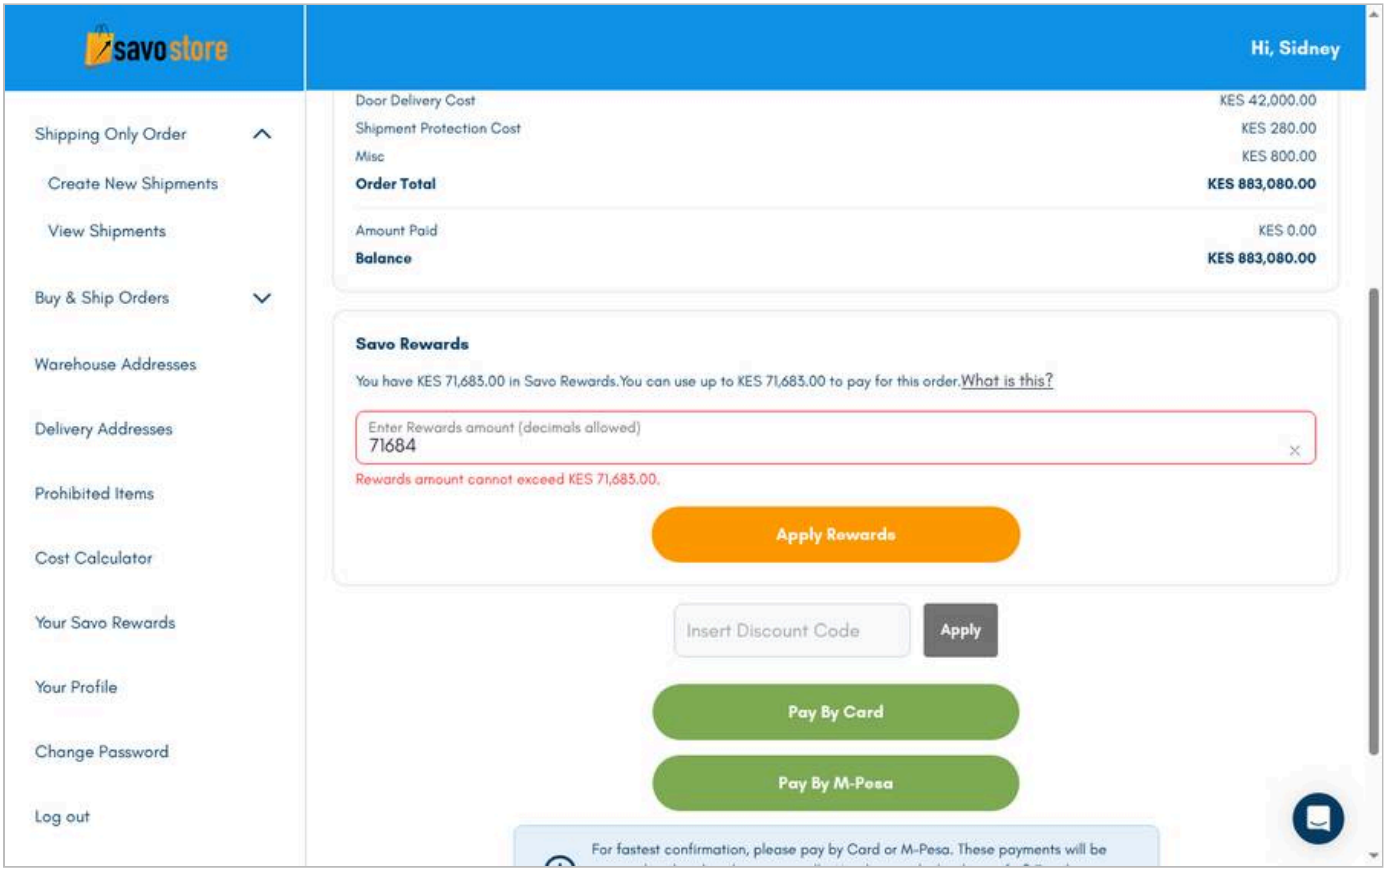

Fig. 110 - `c-07-portal-apply-71684-blocked.png`: Portal apply 71684 blocked

A7 - CRM vs Portal parity PASS

Steps performed	After shipping bump on A1158, opened CRM Rewards Redeemed Create.
Expected	CRM Applicable == portal == min(wallet, 10% x unpaid).
Actual	CRM Create Applicable 40.00 = portal $40; Total Shipping Cost read-only 1,400.
Result	**PASS**

See also: Fig. 51 (a-19-crm-create-applicable-40.png, in #165177 B9); Fig. 96 (a-18-portal-up-to-40.png, in #165348 A2)

A8 - Buy & Ship parity PARTIAL / BLOCKED

Steps performed	Created B&S order B1461 (KES) on portal: shipping KES 7,644, grand total 23,179. Checked portal "up to", CRM Applicable, applied 50 then X, tried exact max, looked for card payment.
Expected	Same unpaid-shipping rule as SO; apply/pay/commit works on BAS.
Actual	Portal "up to" KES 764.40 = 10% of shipping only - PASS. CRM Applicable 764.40 - PASS. Apply 50 then X restores - PASS. Exact 764.40 (and 764.39) would not apply, only 764 - FAIL (minor). B&S invoice offers only "Pay By M-Pesa", no card; Stripe route redirects to list -> payment and commit not tested - BLOCKED (M-Pesa out of scope). Order-total label did not update after apply. B1461 left with a portal-only pending 764 not in CRM.
Result	**PARTIAL / BLOCKED**

See also: Fig. 52 (d-21-crm-applicable-764-40.png, in #165177 B9)

A9 - Partial first redeem then shipping increase PASS

Steps performed	Same run as A2 (USD numbers).
Expected	Additional Applicable from new unpaid shipping only.
Actual	$40 = 10% of the new unpaid $400.
Result	PASS

See also: Fig. 95 (a-17-crm-after-second-package-1400-balance-400.png, in #165348 A2); Fig. 96 (a-18-portal-up-to-40.png, in #165348 A2)

A10 - Balance never negative PASS

Steps performed	Checked balances after every redeem+pay (A1158, A1159).
Expected	total_balance >= 0; paid + rewards = total.
Actual	Balances 0, never negative; paid + rewards = total.
Result	PASS

See also: Fig. 101 (a-28-crm-final-totals-1265-balance-0.png, in #165348 A3); Fig. 44 (d-12-crm-a1159-paid-869080-balance-0.png, in #165177 B8)

A11 - No double wallet deduction PASS

Steps performed	Tracked wallet across payments and reloads.
Expected	Wallet decreased once per successful redemption.
Actual	Each successful redemption deducted once; reloads caused no extra deduction.
Result	PASS

See also: Fig. 20 (a-13-contact-current-552-used-589.png, in #165177 B5); Fig. 102 (a-29-contact-final-512-used-629.png, in #165348 A3)

A12 - Full Ship Individually story PASS (flow) / FAIL (final W = L - U)

Steps performed	Package 1 $1,000 then package 2 $400 on A1158; redeemed and paid for each.
Expected	End-to-end CRM + portal + Rewards Used correct; W = L - U.
Actual	Flow works end-to-end; final W = L - U equality fails (gap 20.50 at that point).
Result	PASS (flow) / FAIL (final W = L - U)

See also: Fig. 101 (a-28-crm-final-totals-1265-balance-0.png, in #165348 A3); Fig. 104 (a-31-portal-rewards-final-512.png, in #165348 A3)

A13 - Wallet never negative; no duplicate used on retry NOT VERIFIED

Steps performed	Webhook retry is not possible from the UI; repeated reloads of success/invoice pages.
Expected	No negative wallet; no duplicate used rows; W = L - U.
Actual	Repeated reloads produced no duplicate used rows; wallet never negative. Webhook retry itself not exercised.
Result	NOT VERIFIED

No screenshot for this case.

A14 - Copy drops after partial apply on shipping increment; X restores FAIL

Steps performed	After shipping bump (cap 40), applied 15, read "up to"; then clicked X.
Expected	After apply copy = 40 - 15 = 25; after X copy = 40, pending gone, prior used unchanged.
Actual	After apply: "up to $23.50" (expected 25; appears computed as 10% of 385 - 15). X restores 40, pending removed, prior used unchanged. Wallet banner briefly showed $537.02 after X (bug 7).

Result	FAIL

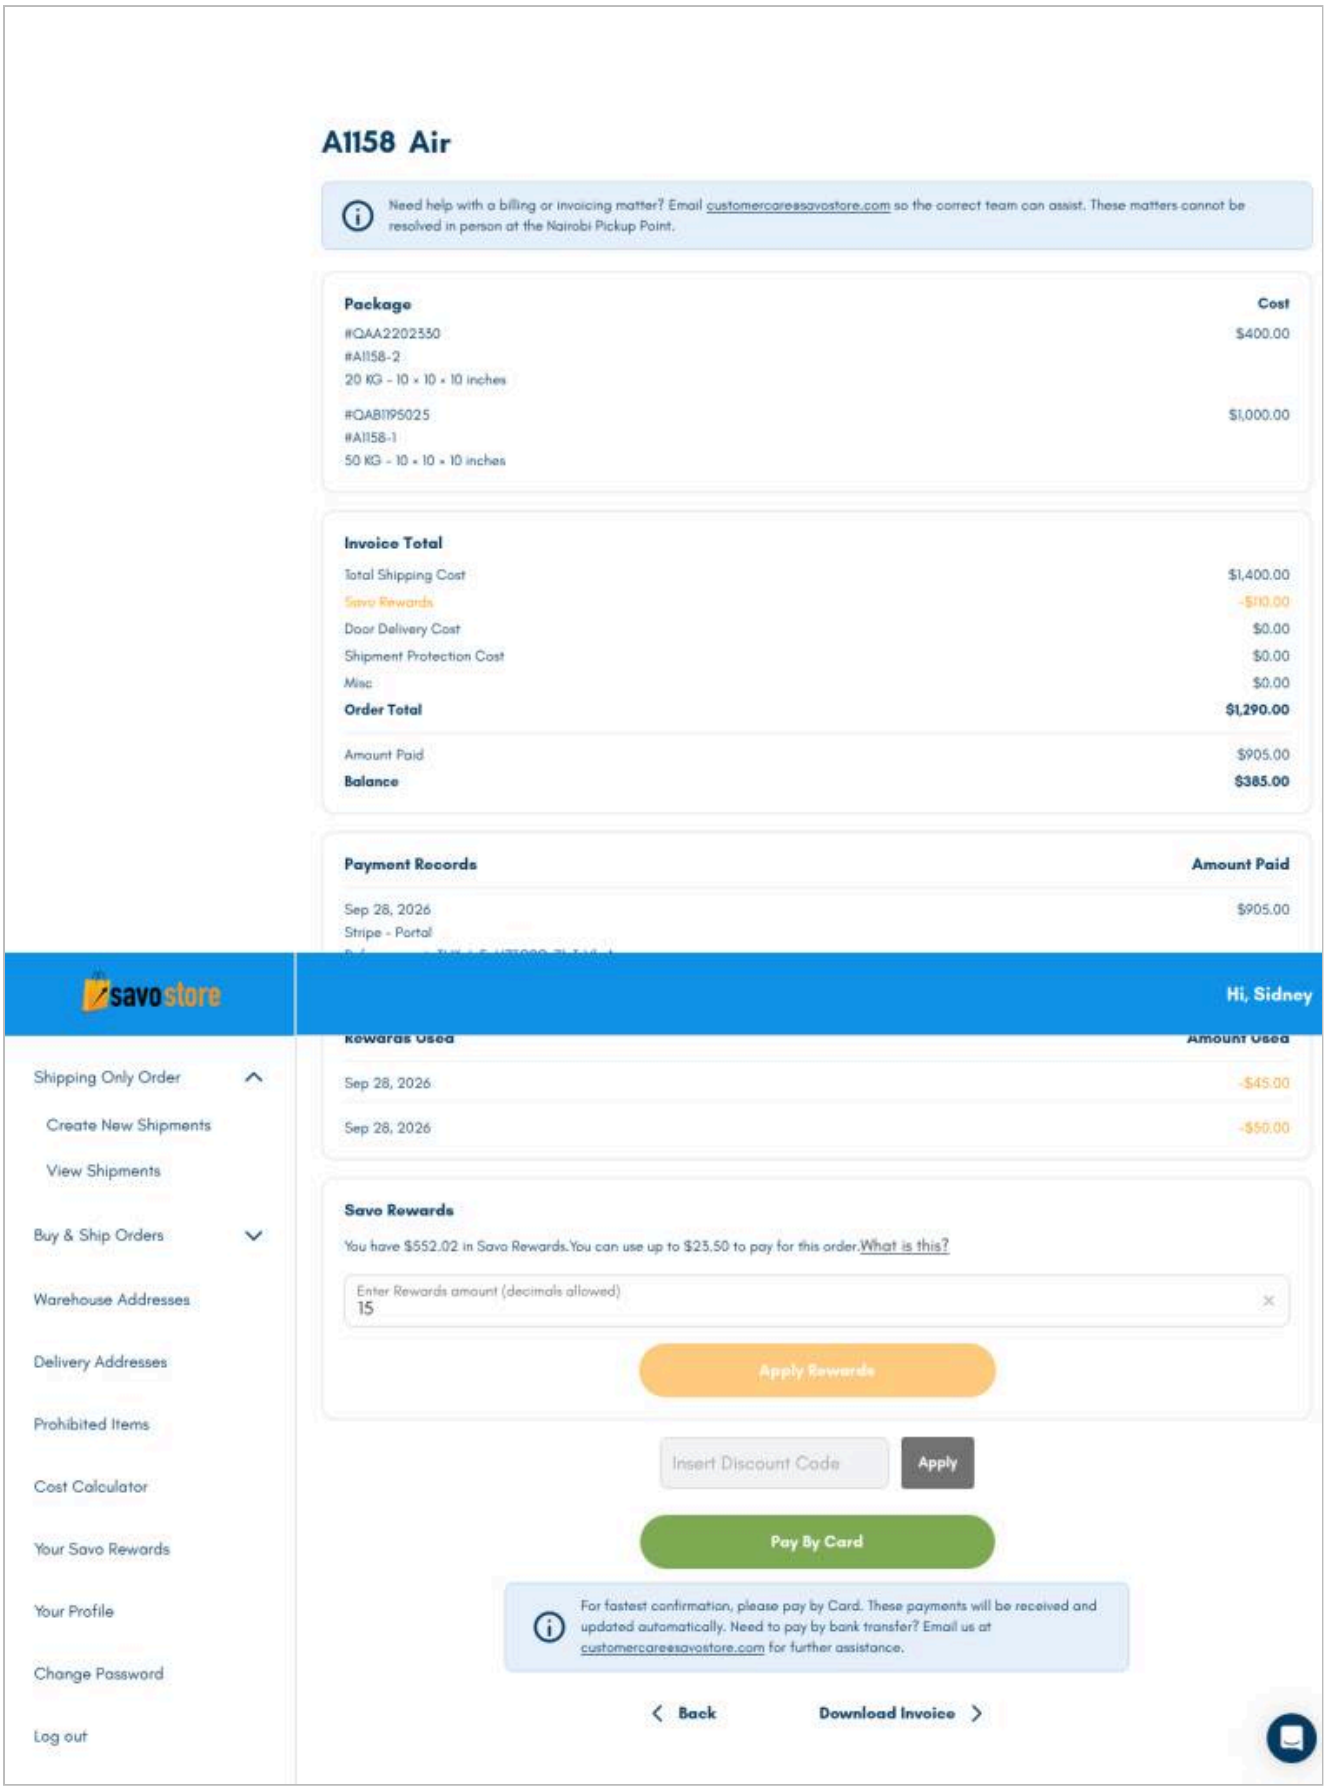

Fig. 120 - `a-20-portal-apply-15-up-to-23-50.png`: Portal after applying 15: "You can use up to $23.50" (expected 25.00); Savo Rewards -$110, balance $385

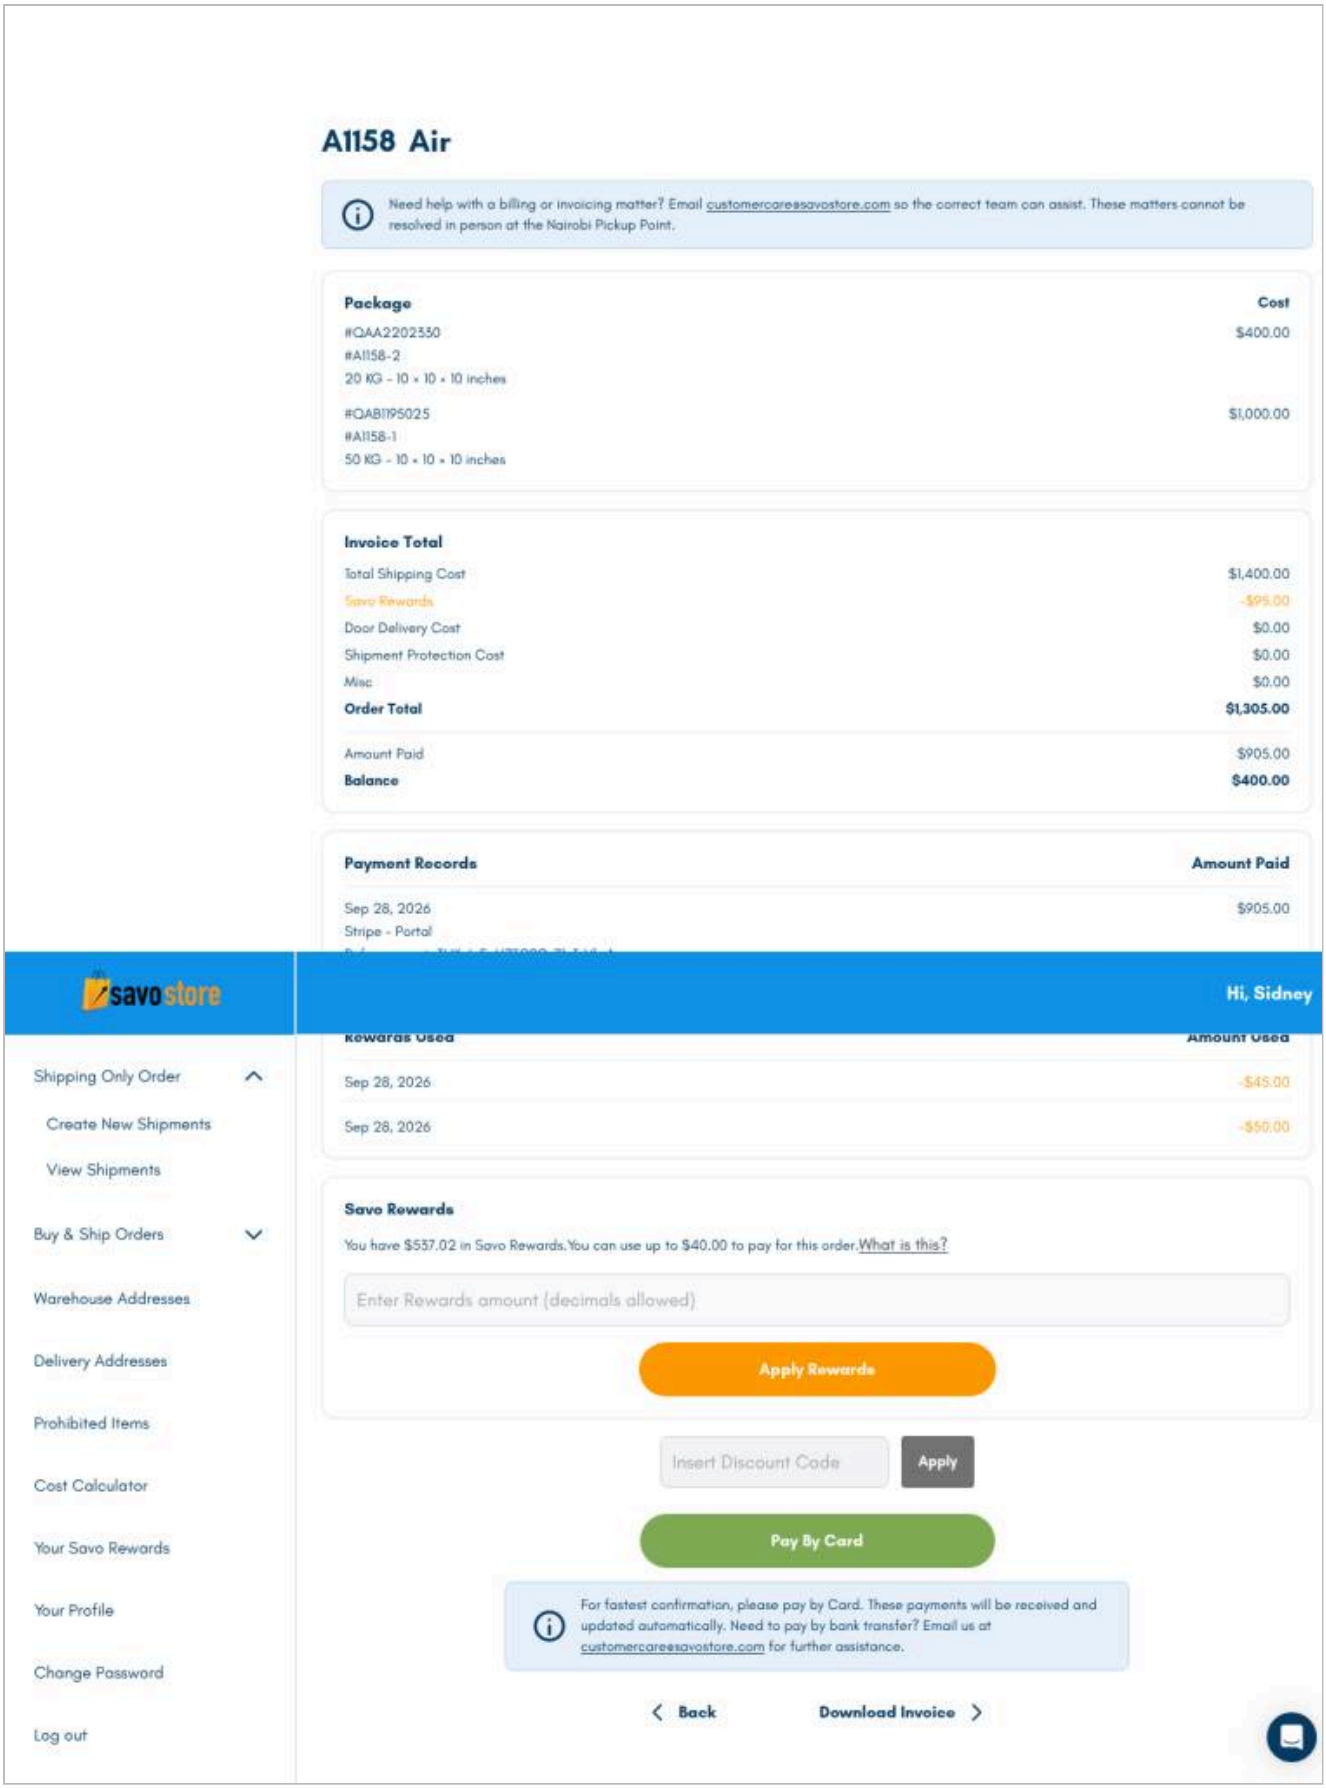

Fig. 121 - `a-21-portal-after-x-upto-40-wallet-537.png`: Portal after x upto 40 wallet 537

New bugs (drafts for review, not posted)

None of these have been posted to Redmine.

Bug 1: Portal rewards are committed when Stripe checkout opens, not after successful payment; abandoning checkout burns rewards Critical

Affected cases: B5, B6, B7, B13, B16, C6, C8, C9

Steps to reproduce:

1. On portal open a Shipping Only invoice (A1158, $1,000 shipping) and apply $50 rewards.
2. Click Pay By Card - Stripe checkout opens.
3. Press Back without paying.
4. Check CRM Rewards Redeemed row, contact wallet and portal Rewards history; reload the invoice.

Expected: Rewards stay pending (Applied) until payment succeeds; abandoned checkout leaves wallet unchanged and no Used row / Rewards Used entry.

Actual: Row "Redeemed rewards against A1158" flips Applied -> Used at checkout open; Current 647.02 -> 597.02, Used 494.13 -> 544.13; portal Rewards Used shows -$50; reload does not release it.

Evidence:

See also: Fig. 22 (b-16-b6-crm-50-status-used.png, in #165177 B6); Fig. 23 (b-17-b6-contact-current-597-used-544.png, in #165177 B6); Fig. 24 (b-21-portal-rewards-history-a1158-50.png, in #165177 B6); Fig. 16 (a-06-crm-45-status-applied.png, in #165177 B5); Fig. 17 (a-09-crm-45-status-used-before-pay.png, in #165177 B5)

Bug 2: Remaining "you can use up to" / replacement limit computed on the rewards-reduced balance High

Affected cases: B3, B7, A14, C10

Steps to reproduce:

1. Open an invoice with cap M (e.g. $1,000 shipping, cap $100).
2. Apply a partial amount (e.g. 60).
3. Read "You can use up to".

Expected: Remaining = cap - pending (e.g. 100 - 60 = 40); replacement validation allows up to the full cap.

Actual: Computed as 10% x (payable after rewards) - pending: $60 on $1,000 -> $34 (exp 40); $15 on 400 unpaid -> $23.50 (exp 25); after $50 -> $45 (exp 50); replacement with 80 blocked at $45.

Evidence:

See also: Fig. 8 (b-06-b3-apply-60.png, in #165177 B3); Fig. 120 (a-20-portal-apply-15-up-to-23-50.png, in #165348 A14); Fig. 26 (b-15-b16-apply80-blocked.png, in #165177 B7)

Bug 3: CRM admin Rewards Redeemed saves as Applied; wallet not deducted on save; Used never incremented High

Affected cases: B8, B10, C7

Steps to reproduce:

1. In CRM open order A1159 (KES) -> Rewards Redeemed subpanel -> Create.
2. Save 14,000 (<= Applicable).
3. Check row status and contact wallet.
4. Customer opens Stripe on portal and pays in full; re-check.

Expected: On save the admin redemption is committed: status Used, Current -$100 (KES 14,000), Used +$100; Current = Lifetime - Used.

Actual: Status stays Applied; wallet not deducted on save; Current drops $100 only when the customer opens Stripe; Used never increases; status still Applied after full payment. Gap Current vs Total - Used grows by $100 (20.50 -> 120.50).

Evidence:

See also: Fig. 31 (c-10-crm-redeemed-detail-status.png, in #165177 B8); Fig. 32 (c-11-contact-after-14000.png, in #165177 B8); Fig. 39 (d-07-contact-after-stripe-open-412-used-629.png, in #165177 B8); Fig. 42 (d-10-admin-row-still-applied-after-pay.png, in #165177 B8); Fig. 43 (d-11-contact-after-pay-412-used-629.png, in #165177 B8)

Bug 4: Pre-existing wallet drift: Current Rewards 20.50 below Total - Used High

Affected cases: B10, C7, E1

Steps to reproduce:

1. Open contact Sidney Test before any test action.
2. Compare Current Rewards with Total Rewards - Rewards Used.

Expected: Current = Total - Used (617.52).

Actual: Current 597.02 vs Total 1,111.65 - Used 494.13 = 617.52 (gap 20.50). Gap persists after earn (E1).

Evidence:

See also: Fig. 53 (e0-01-crm-rewards-baseline.png, in #165177 B10); Fig. 74 (e0-01b-crm-total-rewards.png, in #165348 E0)

Bug 5: Portal apply does not persist when an admin "by" redemption exists on the order Medium

Affected cases: B19

Steps to reproduce:

1. On A1159 have an admin row "Redeemed rewards by Maria.tariq against A1159".
2. On portal apply 5,768.
3. Check CRM subpanel; reload portal.

Expected: A portal "against" pending row is created, X shown, totals updated.

Actual: Success toast shown, but no CRM "against" row, no X; reload reverts.

Evidence:

See also: Fig. 66 (c-14-portal-apply-5768.png, in #165177 B19); Fig. 67 (c-15-crm-two-rows-pending.png, in #165177 B19); Fig. 69 (c-17-portal-reload-only-admin-14000.png, in #165177 B19)

Bug 6: First reload after applying shows stale rewards / payable Medium

Affected cases: B1

Steps to reproduce:

1. Apply $60 on A1158.
2. Full reload of the invoice.

Expected: Pending cleared; payable $1,000.

Actual: Widget resets but totals still -$60 / $940 (CRM row already removed); second load shows $1,000.

Evidence:

See also: Fig. 3 (b-08-b1-after-reload.png, in #165177 B1); Fig. 4 (b-09-b1-second-reload-1000.png, in #165177 B1)

Bug 7: Wallet sentence after X shows wallet minus removed amount until next apply Low

Affected cases: B2, A14

Steps to reproduce:

1. Apply 30 on A1158.
2. Click X.

Expected: "You have $647.02" restored.

Actual: "You have $617.02" until next apply; same on A1158 ($537.02) and B1461 (KES 57,633).

Evidence:

See also: Fig. 7 (b-03-b2-x-cleared.png, in #165177 B2); Fig. 121 (a-21-portal-after-x-upto-40-wallet-537.png, in #165348 A14)

Bug 8: Buy & Ship: only M-Pesa offered (no card), exact decimal max rejected, order total label not updated Medium

Affected cases: A8, C3

Steps to reproduce:

1. Open B&S order B1461 (KES) on portal.
2. Apply the displayed maximum 764.40 (also 764.39).
3. Apply 764; look for card payment.

Expected: Exact max accepted; order total updates; card (Stripe) payment available as on SO.

Actual: 764.40 / 764.39 not applied, only 764; order-total label did not update after apply; only "Pay By M-Pesa" offered, Stripe route redirects to list. Leaves a portal-only pending 764 not in CRM.

Evidence:

See also: Fig. 114 (d-20-portal-b1461-upto-764.png, in #165348 A8); Fig. 117 (d-24-portal-b1461-balance-22415.png, in #165348 A8); Fig. 118 (d-24b-portal-b1461-mpesa-only-no-card.png, in #165348 A8); Fig. 119 (d-25-crm-b1461-savo-rewards-0.png, in #165348 A8)

Bug 9: Invalid discount code: no feedback; "up to" changes while code typed Low

Affected cases: B15

Steps to reproduce:

1. On A1158 type an invalid discount code and click Apply.

Expected: Error message; rewards "up to" unaffected.

Actual: No feedback; "up to" temporarily changes $45 -> $95.

Evidence:

See also: Fig. 62 (b-19-b15-discount-code-typed.png, in #165177 B15)

Other non-rewards observations

- Portal "No protection" selection saved as Yes ($2 / KES 280 protection charged).
- Stripe portal payments stay "Payment Not Confirmed" in CRM although Paid / Balance update (see d-13).
- "Number of Parcel Received" stays "0 OF 1".
- Package status label "Package Invoiced Shipped" (missing "&").
- Portal invoice shows weight in KG with dimensions in inches.
- CRM "Ship Parcel" button click is intercepted by a table cell.
- Ocean Freight Grand Total changed -15 -> -60 after adding a package.
- Some older portal earned dates differ from CRM (e.g. A1121: 6 Jun on portal vs 15/07 in CRM).
- UI typo: "Rewards Redeemded (Percentage)" in admin settings.

See also: Fig. 46 (d-13-crm-payment-not-confirmed.png, in #165177 B8)

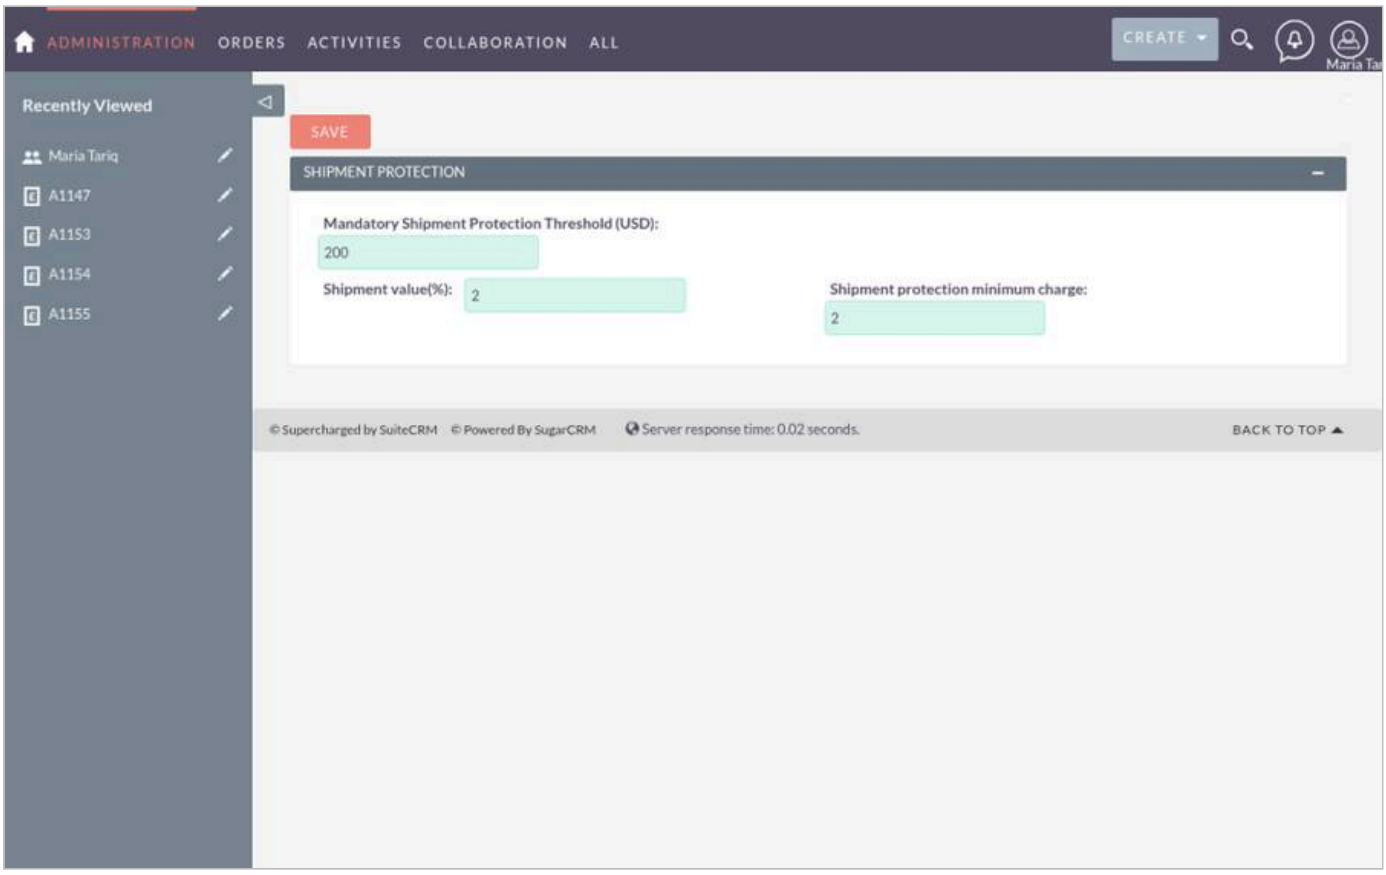

Fig. 122 - `recon-02b-shipment-protection.png`: Shipment protection
